<input type="checkbox"/>	ENVIRONMENTAL MODIFICATION	<input type="checkbox"/>	SENSORY (HEARING, VISION, TACTILE, ETC.)		
<input type="checkbox"/>	OTHER				

BRIEF DESCRIPTION OF AT CHALLENGE:

What does the individual want to do that they can't do?

Individual had severe visual perceptual challenges and intellectual disability. She wanted to be able to sign her checks. She had not been able to learn how to sign her name in the past.

DESCRIBE AT SOLUTION(S):

What does it do? How was it made? How well did it work?

The signature template gives the individual a "trail" to follow when signing her name. It also assists with placement of the signature on a standard check.

Soft plastic was cut out of a notebook cover the size of a standard check.

The individual signed her name on the plastic blank with a medium tip marker with physical assistance.

The signature was cut out with a sharp mat knife leaving a signature trail wide enough for standard pen tips.

The individual is able to sign her name independently now. The template did tend to slip so very thin dycem was applied on the edges with sticky glue.
