

A. Jackson Class Member Demographics – Southwest Region

The Southwest Region had 27 Active Jackson Class Members at the time the sample was selected. Ten JCMs were chosen to be part of the review sample for FY2022. The following two tables describe the demographics of and providers for the JCMs in the Southwest Region.

B. Most Frequently Identified Findings by Category

The Southwest Region had a total of 191 findings. The table below shows the categories and number of findings for this review.

C. Most Frequently Repeated Findings by Category – Charts 4 &5

IQR Findings include the identification of good and exemplary as well as deficient practice. Findings are developed by the Surveyor, reviewed by a Case Judge, Regional Office and State DDSD and DHI Staff before they become final. The expectation is that the identified issue will be resolved not only for the individual but, if applicable, for everyone in that agency for whom the finding is relevant, and resolved in a way that is sustainable so that the identified issue remains “fixed”.

Of the 191 Findings in the Southwest Region’s Review, there were 66 identified as “repeat findings”. Repeat findings are those which have been identified by the IQR within the last ten years. The category where ‘repeat findings’ are most frequently identified is in the area of Adequacy of Planning (24) followed by Health (15). The charts below summarize, by agency, the number of repeat findings which were identified by topic area.

D. Immediate and Special Findings

There were ten (10) Class Members reviewed in the Southwest Region as part of the FY22 IQR. One individual (10% of the total sample) was found to have immediate and/or special findings. There were two Special Findings.

Class Members identified as “**needing immediate attention**” are persons for whom urgent health, safety, environment and/or abuse/neglect/exploitation issues were identified which the team is not successfully and actively in the process of addressing in a timely fashion. Immediate Findings must be **resolved** by the IDT within **30** days to ensure the health, safety and well-being of the individual. Specific timelines will be provided per review.

Class Members identified as “**needing special attention**” are individuals for whom issues have been identified that, are likely to become an urgent health and safety concern. Special Findings must be **resolved** by the IDT within **60** days to ensure the health, safety and well-being of the individual. Specific timelines will be provided per review.

Civil Monetary Penalties (CMPs) for non-compliance may be issued for immediate, special and/or other egregious findings.

The CARMP instruction was not given to staff by on-call nurse. Per vital tracking in Therap on 10/20 vitals were taken on 10/21/21 twice, on 10/22/21 once and on 10/23/21 once.

E. Health, Assessments and Overall Wellness

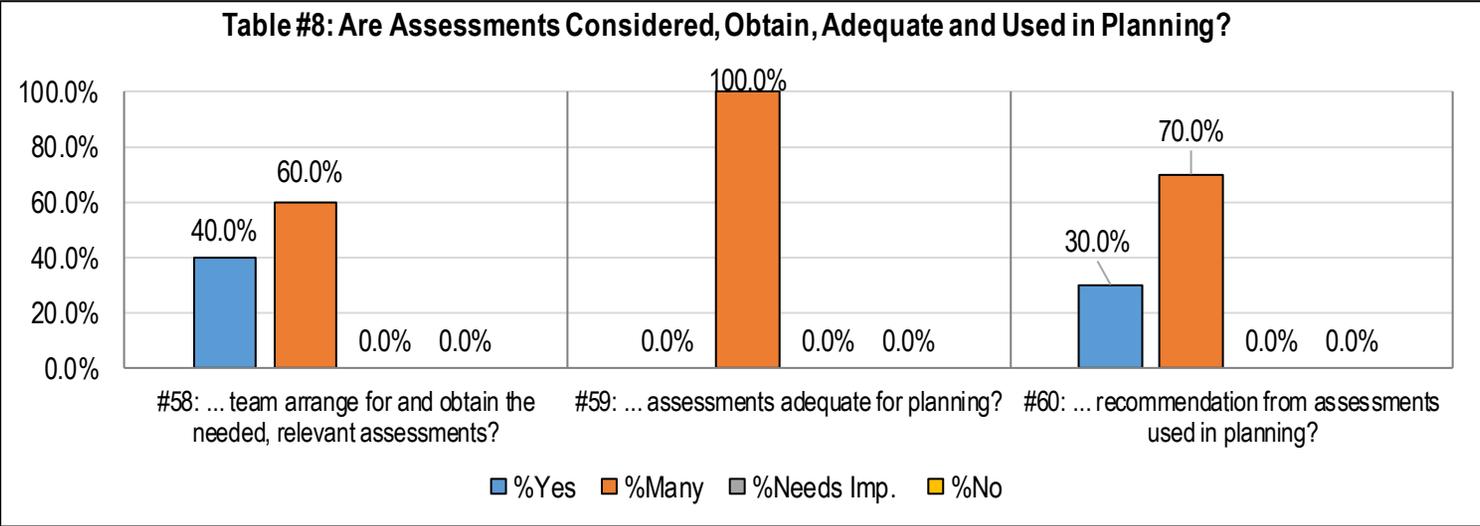

There is a series of scored questions in the IQR protocol that specifically relate to the medical attention received by the class members. The tables which follow detail the findings based on the specific questions asked, those questions are listed prior to each table.

- Question #51. Are all of the individual’s needed medical treatments, including routine, scheduled and chronic needs, timely received?
- Question #52. Has the individual received ... appropriate health screening/immunizations in accordance with national best practice and/or as recommended
- Question #53: Does the individual receive medication as prescribed?

Ensuring individuals have the medical treatment they require includes scheduling and obtaining needed assessments, and using information from those assessments to influence treatment and inform future planning. The IQR also evaluates the assessments needed by the individual and whether or not those assessments are obtained by the teams as summarized below.

- Question #58: Did the team arrange for and obtain the needed, relevant assessments?
- Question #59: Are the assessments adequate for planning?
- Question #60: Were the recommendation from assessments used in planning?

Beyond the protocol questions, a letter of Findings is issued for each class member. This letter is developed by the Surveyor, reviewed by the Case Judge, Regional and State DDSD and DHI staff prior to becoming final. The table below summarizes some of the issues which were identified. It is important to note that the information below identifies the number of issues found; not the number of findings. For example, if one individual was found to have a Medication Administration Record (MAR) which called for the administration of a medication for which a doctors order was not found AND was also found to have been given a medication twice a day when the doctor's order called for one time a day, that might be ONE finding regarding medication but TWO different issues.

For health care coordination, oversight and monitoring, I/DD services rely heavily on nurses, primary care physicians and referrals to needed specialists. Nurses and the supports they can provide are essential for the protection and healthy living of class members. Relevant scored protocol questions related directly to nursing include:

Question #50a: Is the eChat updated timely with the ISP and after changes in condition?

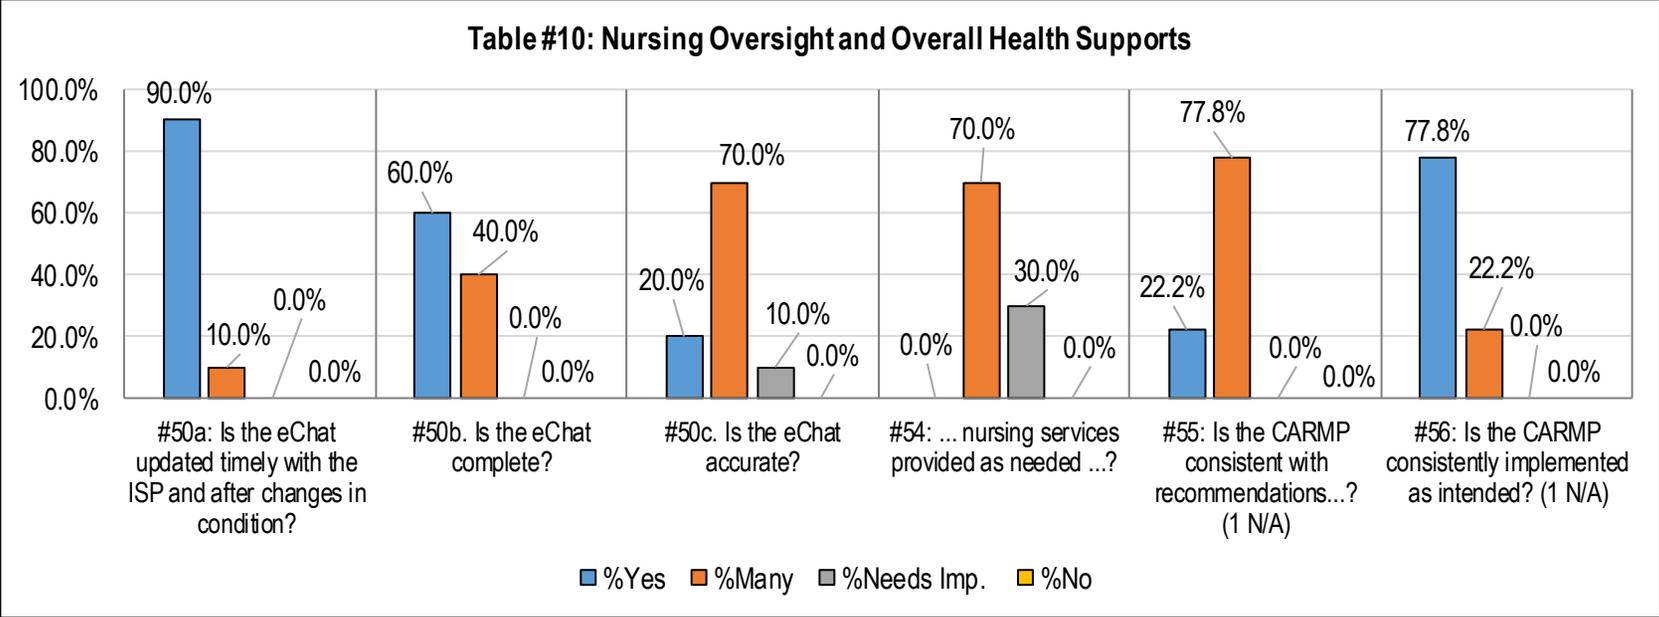

Question #50b: Is the eCHAT complete?

Question #50c: Is the eCHAT accurate?

Question #54: Are nursing services provided as needed by the individual?

Question #55: Is the CARMP consistent with recommendations in other healthcare documents?

Question #56: Is the CARMP consistently implemented as intended?

Oversight provided by nurses is a critical safeguard for Jackson Class Members, direct support professionals and their supervisors. The table below provides specific details, by Residential provider, of nursing related issues identified during the 2020 Southwest IQR. Again, this represents the number of issues found; not the number of findings.

In addition to the issues and questions noted above, the individual’s nurse is responsible, with the assistance of the rest of the Team, to assure that the documents presented and created for planning, such as the ISP, are accurate, thorough and contain the needed plans and information required. The protocol questions related to ensuring this is done include:

- Question #80: If needed, does the ISP contain a specific MERP?
- Question #81: Does the ISP contain information regarding primary health (medical) care?
- Question #81a: Does the ISP face sheet contain contact information listed in the ISP?
- Question #81b: Is the Health Care Coordinator’s name and contact information listed in the ISP?

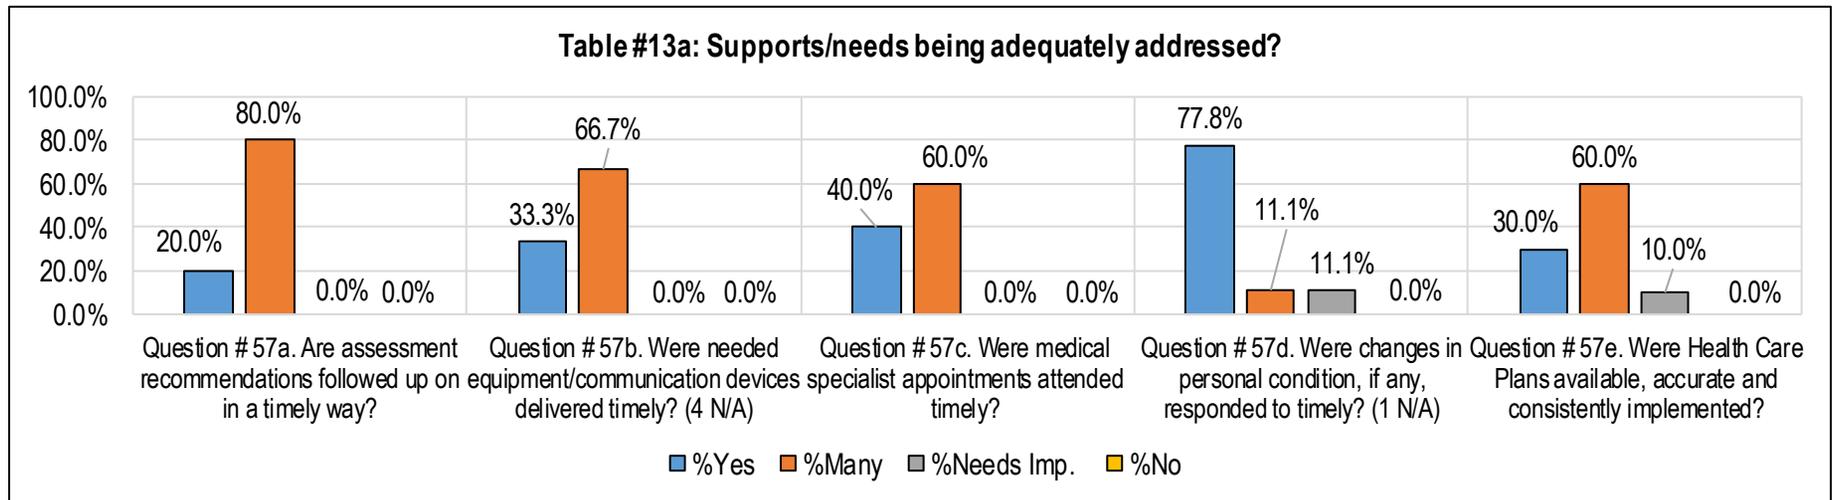

There are many components to ensuring the health and safety of individuals with I/DD. These components vary and are unique to each individual. While the scored protocol questions cannot encompass each and every issue, it does allow for a general score that measures the adequacy of response to the individual's overall health needs. That question is #57: Are the person's health supports/needs being adequately addressed?

As noted in the table below, for the 10 people scored in Southwest review, overall, one class member had their health supports/needs adequately addressed. The other nine people had many of their needs addressed.

See the following chart for further detail on the specific items assessed in Question #57.

- Question # 57a. Are assessment recommendations followed up on in a timely way?
- Question # 57b. Were needed equipment/communication devices delivered timely?
- Question # 57c. Were medical specialist appointments attended timely?
- Question # 57d. Were changes in personal condition, if any, responded to timely?
- Question # 57e. Were Health Care Plans available, accurate and consistently implemented?

As noted earlier, beyond the scored protocol questions, the Findings Letters issued for each class member in a review provides person-specific detail about the issues which impact the answer to protocol question #57. This includes the adequacy and incorporation of needed tracking, ancillary support services, and other areas to ensure the health and safety of the individual being reviewed. Again, it is important to note that the indications are number of issues found; not the number of findings in the Findings letters. For example, if one individual had a finding that noted four different inconsistencies in that person's seizure tracking, that would be counted as a "4", for the number of issues, not just a "1" for the individual to whom the findings apply.

F. Adequacy of Planning, Adequacy of Services, Individual Service Plan

Before a plan can be implemented, it must first be created. The ISPs that provide details regarding the individuals' visions and outcomes are supposed to be developed by an Interdisciplinary Team that includes the Individual and those who know and provide supports to that person. This includes the Case Manager, Guardian, the Direct Support Professionals, Therapists, Nurse(s), any additional individuals invited by the class member and persons who are needed to ensure the implementation of the Plan. The FY22 IQR protocol specifically probes many of the aspects of the planning process, including detail of who participates in plan creation. The table below lists answers to related questions in the FY22 Southwest review.

Question #63: Was the ISP developed by an appropriately constituted IDT?

Question #64: For any team members not physically present at the IDT meeting, is there evidence of their participation in the development of the ISP?

Question #32: Did the [day/employment] direct service staff have input into the person's ISP?

Question #40: Did the [residential] staff have input into the person's ISP?

Question #92: Was the person provided the assistance and support needed to participate meaningfully in the planning process?

One foundational component of an individual's ISP is the Long Term Vision, which summarizes what the individual wants to accomplish in the near future (3 to 5 years) in each life area. To that end, Outcomes are to be developed by the Team in a way that results in an accomplishable path to the visions. The FY22 IQR protocol specifically probes the content of identified visions as well as the content and clarity of related outcomes. The table below details the findings related to the following identified questions related to class members ISP in the FY22 Southwest review.

- Question #66: Overall, does the long-term vision show expectations for growth and skill building?
- Question #160: Does the person have an ISP that contains a complete Vision Section that is based on a long term view?
- Question #67: Overall, does the ISP give adequate guidance to achieving the person's long-term vision?
- Question #75: Overall, are the ISP outcomes related to achieving the person's long-term vision?
- Question #76: Overall, do the ISP outcomes, action plans and T&SS address the person's major needs?
- Question #74: Overall, do the outcomes in the ISP include criteria by which the team can determine when the outcomes have been achieved?

Additional components of an individual’s ISP include Action Steps, which should be written in measurable terms, which logically leads to the achievement of the related outcome. The data gathered during the implementation of the Action Steps should also be written in measurable terms, so team members can review them and determine if measurable progress toward the outcome is being made. The table below details the findings related to specific questions which probe the action steps and data collection intended to verify progress and opportunity for class members.

- Question #68: Is measurable data kept which verifies the consistent implementation of each of the action steps?
- Question #69: Does the data kept identify what the person does so a determination can be made regarding the progress/lack of progress?
- Question #70: Is each action step in the ISP implemented at a frequency that enables the person to learn new skills?
- Question #71: If the person is not successful in achieving action steps, has the team tried to determine why, and change their approach as needed?
- Question #72: If the person achieves action steps, does the team move to the next in a progress of steps or develops a new one?
- Question #73: Has the person made measurable progress on action steps during the past year?

As these tables show, data collection needed to verify progress being made and/or the frequency with which the person has the opportunity to engage in his/her ISP Action Steps continues to be a significant issue for the majority of class members and the agencies which support them.

In addition to the components listed above, the Teaching and Support Strategies (T&SS) are also an integral part of the ISP. T&SS should be developed by the residential and/or day provider responsible for implementing the T&SS. Input from others such as therapists should be included as needed. WDSIs are developed by therapists as a complement to the T&SS. All T&SS and WDSIs should provide guidance for those direct support professionals who support the person in achieving his/her Vision/Outcomes. The following protocol questions in the FY22 IQR relate to the T&SS and implementation of the ISP.

- Question #77: Are the T&SS sufficient to ensure consistent implementation of the services planned?
- Question #78: Are the recommendations and/or objectives/strategies of ancillary provider integrated into the ISP?
- Question #89: Were the direct service staff able to describe their responsibilities in providing daily care/supports to the person?
- Question #88: Was the direct service staff trained on the implementation of this person's ISP?
- Question #86/87a: Is the ISP being implemented?

As evidenced above, the different components of each person’s ISP are evaluated. Based on that analysis, an overview of the adequacy of ISP content as well as implementation and effectiveness of the ISP can be determined. There are multiple questions in the FY22 IQR protocol that probe these items, and the level of intensity of services that individuals in the review receive.

- Question #65: Does my ISP contain current and accurate information?
- Question #124: Overall, has the IDT process been adequate for assessing, planning, implementing and monitoring of services for this person?
- Question #85: Overall, is the ISP adequate to meet the person’s needs?
- Question #161: Does the person receive services and supports recommended in the ISP?
- Question #87b: Are current services adequate to meet the person’s needs?
- Question #164: Is the total program of the level of intensity adequate to meet this person’s needs?

G. Case Management

Case Management services are intended to be person-centered and are key to enabling people to pursue their desired life outcomes while gaining greater independence and access to needed services and supports. The region scored well on two questions, “does the case manager know the person” and “is the Case Manager available to the person” as pictured below. The tables below detail the related findings.

Question #24: Does the case manager “know” the person?

Question #25: Does the case manager understand his/her role/job?

Question #26: Is the case manager available to the person?

Question #27: Was the case manager able to describe the person’s health related needs?

Other important questions related to Case Management include:

Question #28: Does the case manager have an appropriate expectation of growth for this person?

Question #29: Does the case management record contain documentation that the case manager is monitoring and tracking the delivery of services as outlined in the ISP?

Question #30: Does the case manager provide case management services at the level needed by this person?

H. Supported Employment

Access to competitive integrated employment enables an individual to engage in community life, increase personal resources, improve self-sufficiency and contribute back to the community. The 2018 Waiver Standards emphasize that, “employment should be the first consideration. If someone does not choose employment, the decision should be based on informed choice”. Making an informed choice about employment is an individualized process. All people have unique histories and backgrounds, which means that some people may have limited experiences and will require more information to make a decision about employment while others may have a rich and varied employment history and can make an informed choice based on that history.

There are multiple components that make up the process of ensuring Informed Choice. These are probed as part of the Individual Quality Review, and detailed in the tables below. As the 2018 DD Waiver Standards emphasize,

2018 DD Waiver Standards Chapter 4.5... “Person-centered practice must include informed choice. Informed choice is when a person makes a decision based on a solid understanding of all available options and consequences of how that choice will impact his/her life. Options are developed through a partnership with the person and knowledgeable supports, including team members and nonpaid supports who empower the person to make informed choices. Informed choice is critical in PCP and can move the lives of people with I/DD forward.”

Informed choice generally includes the following information from 2018 DD Waiver Standards Chapter 4.5 and 6.6.3.4:

1. **Assessment:** The first step in making an informed choice about employment starts with the assessment process.
2. **Information:** ... discussing with the person/guardian what was learned through the assessment (4.5) is also expected and helpful. In addition, providing information about different work options and resources available to the person in a way that is understandable by the person is important.
3. **Experience:** If a person has no volunteer or work history, then the individual and guardian should consider trying new discovery experiences in the community to determine interests, skills, abilities, and needs. Opportunity for Trial Work or Volunteering: ... providing the individual with access to job exploration activities including volunteer work and/or trial work opportunities, if the individual and guardian are interested, is key.
4. **Identification of barriers:** considering potential impact on the person’s life, health and safety and creating strategies to address any related issues that may arise.

The IQR Questions related to these four Informed Choice areas and the results follow.

1. Components of Informed Choice: Assessment

Question #125. Does (Name) have a current Person-Centered Assessment?

Question #126. Did this assessment address vocational interests, abilities and needs?

Question #127. Did the individual participate personally in the Person-Centered Assessment?

Question #128. Did the Guardian participate in the Person-Centered Assessment?

Question #129. Is the individual engaged in the Informed Choice Project? *Note: This question was answered N/A by all surveyors as this project no longer exists.*

2. Components of Informed Choice: Information and Experience

- Question #130. Has the individual been offered the opportunity to participate in work or job exploration including volunteer work and/or trial work opportunities?
- Question #131. If #130 is Yes, are these new experiences clearly documented in the ISP Work, Education and/or Volunteer History section?
- Question #132. If #130 is No, is the individual trying new discovery experiences in the community to determine interests, abilities, skills and needs?
- Question #133. Has the Guardian had the opportunity to gain information on how the individual responded during job exploration activities such as volunteering and/or trial work experiences?
- Question #134. Has the individual received information regarding the range of employment options available to him/her?
- Question #135. Has the Guardian received information regarding the range of employment options available for the individual?
