

A. Jackson Class Member Demographics – Metro Region

As of April 24, 2019, there were 146 Active Jackson Class Members in the Metro Region. Details regarding individuals in current review sample are provided in the tables below. There were 17 class members reviewed in the Metro region for the first review of the 2019 IQR, and 16 more were reviewed in the second round, for a total of 33 Jackson Class Members in the Metro Region to date.

Since the beginning of the 2019 IQR, five Jackson Class Members in Metro region have passed away. As of January 25, 2020, Metro region has 141 class members.

B. Most Frequently Identified Findings by Category

After two rounds of reviews, Metro Region has a total of 578 Findings. The table below shows into what categories those findings fall.

C. Most Frequently Repeated Findings by Category

IQR Findings include the identification of good and exemplary as well as deficient practice. Findings are developed by the Surveyor, reviewed by a Case Judge, the Community Monitor, DDS Regional Office, State DDS and DHI Staff, and the individual and his/her Team to ensure accuracy before they become final. The expectation is that the identified issue will be resolved not only for the individual but, if applicable, for everyone in that agency to whom the finding is relevant, and resolved in a way that is sustainable so that the identified issue remains “fixed”.

Of the 578 Findings in the Metro 1 & 2 Reviews, there were 103 (18%) identified as “repeat findings”. Repeat findings are those which have been identified by the IQR during previous reviews (within the last ten years). The category where ‘repeat findings’ are most frequently identified is in the area of Planning and Services, followed by Health/Assessments. The charts below summarize, by agency, the number of repeat findings which were identified by topic area.

D. Immediate and Special Findings

There were 33 Class Members reviewed in Metro Rounds 1 & 2 as part of the 2019 IQR. Twenty-two (22) individuals (67%) were found to have immediate and/or special findings. Twelve (12) individuals (36%) were found to have Immediate Needs. Three of these twelve also had Special Findings. Ten (10) additional individuals were found

to have Special Needs. A total of thirteen (13) individuals were identified with Special Need (59%). There were seventeen (17) Immediate findings and twenty-five (25) Special findings. Details of the issues of these findings are identified in the table below.

Class Members identified as “**needing immediate attention**” are persons for whom urgent health, safety, environment and/or abuse/neglect/exploitation issues were identified which the team is not successfully and actively in the process of addressing in a timely fashion.

Class Members identified as “**needing special attention**” are individuals for whom issues have been identified that, if not addressed, are likely to become an urgent health and safety concern.

As the following summary highlights, the number of Immediate and/or Special Findings cluster in the following topic area:

- 10 findings identified related to Health Oversight
- 8 aspiration/CARMP issues
- 8 related to Medication/Side Effects
- 7 equipment issues
- 5 symptoms/issues not being followed up on
- 2 HCP/MERP discrepancy issues
- 1 related to not following orders/instructions
- 1 safety/lack of adequate staff
- 1 DNR in place/staff didn’t know

Agencies which were found with Immediate and/or Special Findings clustered in the following way.

M1	A Step Above	ADID Care	ADID Care		X		BM logs not monitored; many gaps not reported; up to 11 days with no documented BM.
M2	Carino	Life Mission	LifeRoots	X			Information regarding peanut allergy contradictory between eChat, MAAT, MERP and Allergy Profile.
M2	A New Vision	Adelante	Adelante		X		BM tracking has multiple gaps; JCM was hospitalized for fecal impaction
M2	Unique Opportunities.	Advantage Communications	Advantage Communications		X		There is evidence of situations in which the team has had significant issues with communication regarding, in part, JCM's health related issues. Email communication between team members indicate multiple miscommunications between the team
M2	Unique Opportunities.	Advantage Communications	Advantage Communications		X		CM, BSC and Day/Residential staff interviews reflect inconsistencies as it relates to JCM's regression and/or progress with his health/behavioral status:
M2	Unidas	ARCA	Expressions Unlimited	X			Inconsistency about 1:1 vs. group supervision; HRC approved deices are not present; dexa scan recommended but has not received (JCM has Osteopenia); JCM has had number falls and has gait issues; JCM had cut and went to ER; no IR/GER filed.
M2	Peak	ARCA	ARCA		X		There is no evidence that the nurse is completing quarterly health care reports, who is at moderate risk for aspiration and moderate acuity level
M2	Unidas	LLCP	LLCP		X		There was a lack of timely completion of Nursing quarterly and Monthly notes. Notes were all completed on 10/22/19. LLCP Monthly Nursing reports were dated 10/22/19 for the months 11/2018, 12/2018, 1/2019 and Quarterly Nursing reports dated 10/22/19 (9/1/18-12/31/18) and 7/1/19 (1/1/19-4/30/19) were not completed timely.
M2	NMQCM	Bright Horizons	CFC		X		eChat includes information that is not current, accurate or consistent with other documents
M2	NCQCM	Bright Horizons	CFC		X		<p>Nursing records and interviews do not indicate that nursing services have been consistently provided as needed</p> <ul style="list-style-type: none"> • Nursing notes provided for this review document only two monthly face to face visits during the past year (9/30/19 and 8/21/19). eChat lists acuity as high, requiring monthly face to face visits. • MAR indicates Metamucil to be given 1x per day. Dr's order and pharmacy label both indicate it is to be given 2x per day. • Elimination record provided for this review is incomplete. Only 22 days are reflected in the elimination record for the 3 months from 7/11/19-10/13/19. BMs are recorded on 18 of these days • Bright Horizons Annual nursing report of 10/7/19 includes no comments, recommendations or other assessment statement regarding the status of JCMs health. • Based upon review of Bright Horizons Semi-Annual Nursing reports (9.17.19 and 10/19), they did not provide the team a picture of his currently health status, significant health changes or progress towards his health-related goals. • eChat is not complete and accurate (see #4 above) • CFC (day services) nurse, during interview did not report multiple diagnoses listed on eChat diagnosis table including: gastritis, esophagitis, hiatal hernia, and anemia. • CFC nurse, during interview, reported that JCM had not had colon cancer screening. GI report provide for this review indicates he had colonoscopy on 1/29/19

							<ul style="list-style-type: none"> CFC nurse, during interview, reported that she sometimes has difficulty getting copies of current medical reports. She stated the most recent annual physical she has is “over a year old”, and the most recent dental report she has was from 1/3/18. CFC nurse, during interview, stated that JCM does not see any medical specialists. Documents provided for this review indicate that he has seen the Neurologist and Gastroenterologist multiple times in the past year, had a swallow study on 9/10/19 and was seen for TEASC on 10/11/18.
Medication/Side Effects							
M1	A Step Above	Adelante	Adelante		X		Receiving Dilantin in 1 dose; should be split per FDA. Invite Team to review and confirm with prescriber.

M1	A Step Above	ADID Care	ADID Care		X		MAR lists Erythromycin as a medication the person should take, she is allergic to this med.
M1	Peak	Adelante	Adelante		X		Dr Order for benefiber is 6tsp/day; she is getting 11 per day on weekdays.
M1	A New Vision	Adelante	Adelante	X			Order for Creon is 2 cap/po 3x day; via applesauce pudding or puree; Staff notes he is always tube fed; unsure how he is getting Creon, if he is.
M2	Peak	Dungarvin	Dungarvin	X			JCM has allergy to Ibuprofen; Ibuprofen was listed on MAR
M2	A New Vision	LLCP	None	X			Doxycycline Monohydrate medication is not consistently given 1 hour before a meal as directed. The side effects for doxycycline monohydrate taken on an empty stomach can not only lead to considerable discomfort but may increase risk for aspiration. Also the RN discontinued the Zantac medication and removed it from the home due to the pharmacy notifying of a recall. There is No evidence PCP was notified or that an alternative has been prescribed.
Not following orders/recommendations							
M1	A New Vision	Adelante	Adelante	X			Dr Order says to not use gauze; Nursing says it is a nursing decision to put pads on external bolster; MAR says to put gauze on Stoma. Invited Team to double check under what circumstances gauze can be used for stoma care.
Symptoms/Issues not being followed up							
M1	NMQCM	Adelante	Adelante		X		Insomnia continues although medication has been tried; naps taken during day; PCP has not been asked about it.
M1	Peak	Adelante	Adelante		X		All staff note she is in pain; no evidence how much, why or how being addressed.
M1	A New Vision	Adelante	Adelante		X		DCF says will f/up will be done every 3 months for masses/tumors/lesions; no f/up noted.
M2	Peak	ARCA	ARCA	X			There is no documentation of the team holding a meeting to develop a plan of what to do about blood being detected in stool after having fecal occult testing
M2	Unidas	Dungarvin	Share Your Care			X	Per bowel movement tracking, it appears there are a number of times JCM has gone more than 3 days without having a BM. There is no documentation of nurse notification in nursing notes. Per nursing notes the most recent prn identified was on 9/25/19 in which the nurse approved prn medication, but it did not identify the problem or the medication. Per the 9/2019 MAR the medication was Milk of Magnesia.
Aspiration/CARMP Issues

M2	Unidas	LLCP	LLCP		X		Nursing Semi-Annual reports indicate liquids at thick honey consistency; per the CARMP liquids are nectar consistency
M2	Peak	Arca	Arca	X			JCM had episodes of vomiting ... Consistent tracking as identified in the CARMP was not completed (e.g., vital signs). Emesis vitals in excel spreadsheet from Therap do not correlate to incidents of emesis as noted in record in nursing and/or medical assessment documentation. Additional emesis tracking was requested during nursing interview, and was not received. Per documentation in record, emesis occurred on 10/4/18 during dental exam 3/8/19 and 7/11/19 prior to lunch. For 3/8/19, no tracking, 3/9/19 2x, no tracking 3/10-3/11/19. For 7/11/19, 1 vital sign entry is recorded, no vitals recorded on 7/12-7/14/19.
M2	NMQCM	Bright Horizons	CFC		X		CARMP has not been consistently implemented <ul style="list-style-type: none"> During interview, SLP responded to question asking if CARMP is consistently implemented across all environments by stating: "No not yet, we are working to improve that. Right now the issue is that the house doesn't seem to know where his spoon is ... Residential staff report, during interview, that the build-up handle spoon was received the Thursday before the on-site visit and that they did not have one in the home prior to that time. Neglect was substantiated due to JCM receiving "unauthorized altered meals from 4/23/19-7/9/19" that were not consistent with CARMP (case # 2K20-0086-A and 2K20-0086-B Guardian, during interview, stated regarding the ANE for not following the CARMP, "I don't think it is totally resolved", later stated that food consistency was the greatest challenge facing JCM. Stated that staff have been trained, and that "they just need to do it correctly every time. Those are the kinds of things that create SIB, JCM is that aware of those things".
HCP/MERPs/eChat discrepancies (2 Special findings)							
M2	NMQCM	Bright Horizons	CFC		X		Some Health Care Plans are not available or do not provide adequate information to guide staff <ul style="list-style-type: none"> No HCP for BMI provided by CFC. Required per eChat. Bright Horizons HCP for oral hygiene does not include important information on toothbrushing procedures consistent w/ CARMP. (Note: there should not be a HCP on issues addressed in the CARMP). Examples include: HCP provides no information on positioning for toothbrushing, does not indicate that no toothpaste is used, dip brush in mouthwash and shake off excess, provide oral stimulation prior to brushing, stop oral care immediately and contact nurse if coughing or choking occur, position upright for 10 minutes after brushing
Equipment Issues							
M1	Unique Oppor.	Adelante	Adelante	X			W/C is not in good repair; his tilt is not working;
M1	Peak	Adelante	Adelante		X		W/C has issues per all staff – except PT; needs repair
M2	Carino	Life Mission	LifeRoots		X		Based on on-site observation and DSP interview, the bathing gurney is old and stained, and the pad is cracked in multiple places.
M2	Unidas	Dungarvin	Share Your Care		X		JCM uses custom made chairs during mealtime located at both Day Hab and home... per Residential observation JCM slid towards the front of the chair ...it appears the cushion slid forward. JCM also slides forward when in the chair at Day.
M2	Peak	Arca	Arca	X		X	CARMP, 7/30/19, states bed is to be at 30°. HCP for GERD states bed is to be at 45°. Both Direct Support Professionals (DSPs) in interviews stated his bed is to be at 45°. His bed is controlled by an electronic hand held adjustment device. DSP stated that they adjust the bed for PM. There was no gauge on the bed to adjust the bed to a specific degree.

M1	Peak	Adelante	Adelante		X		Number of staff in home is not adequate; she requires 2-person lift; ANE was file in 2018 regarding this issue; remains an issue

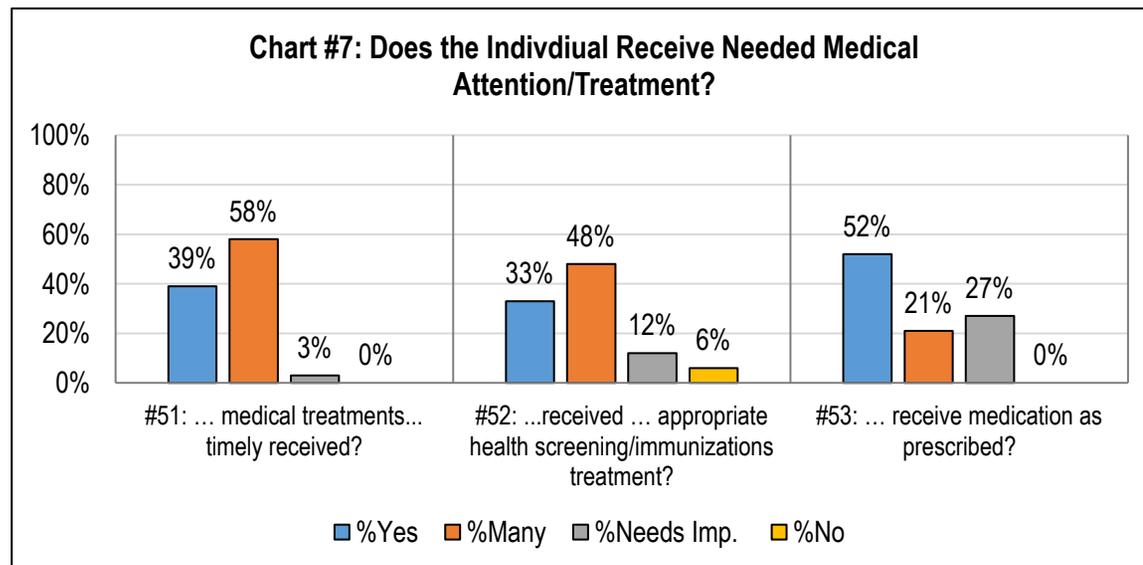

E. Health, Assessments and Overall Wellness

There is a series of scored questions in the IQR protocol that specifically relate to the medical attention received by the class members. The charts which follow detail the findings based on the specific questions asked, those questions are listed prior to each chart.

Question #51. Are all of the individual's needed medical treatments, including routine, scheduled and chronic needs, timely received?

Question #52. Has the individual received ... appropriate health screening/immunizations in accordance with national best practice and/or as recommended

Question #53: Does the individual receive medication as prescribed?

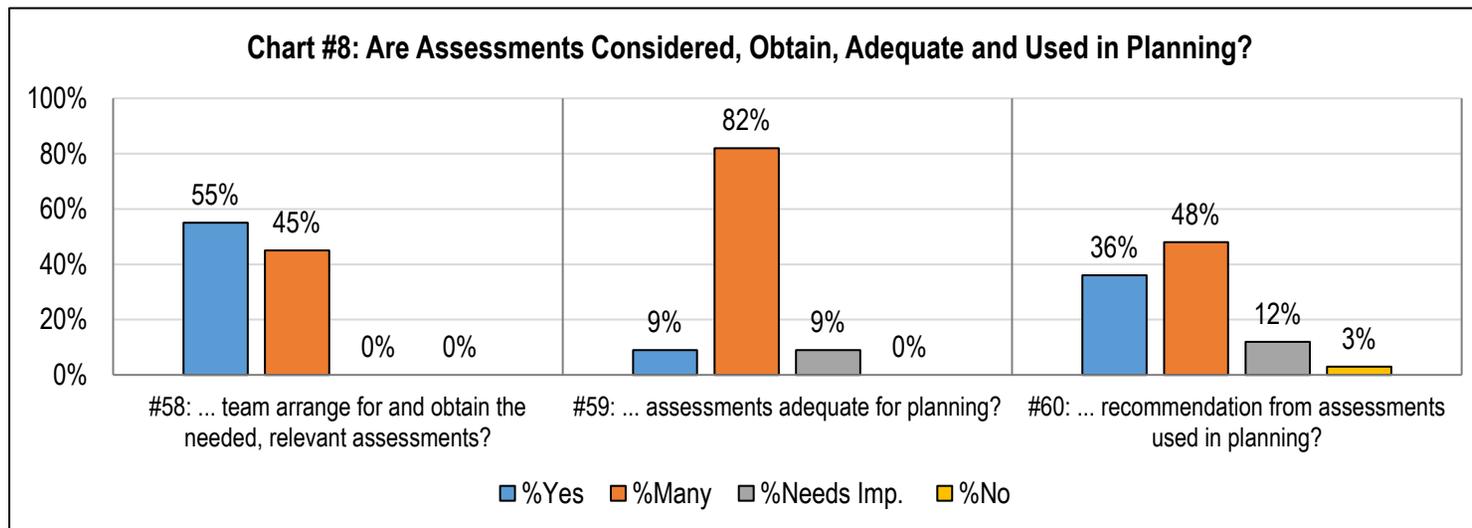

Ensuring individuals have the medical treatment they require includes scheduling and obtaining needed assessments, and using information from those assessments to influence treatment and inform future planning. The IQR also evaluates the assessments needed by the individual and whether or not those assessments are obtained by the teams as summarized below.

Question #58: Did the team arrange for and obtain the needed, relevant assessments?

Question #59: Are the assessments adequate for planning?

Question #60: Were the recommendation from assessments used in planning?

Beyond the protocol questions, a letter of Findings is issued for each class member. This letter is developed by the Surveyor, reviewed by the Case Judge, Community Monitor, Regional and State DDSD and DHI staff, the individual and his/her team prior to becoming final. The table below summarizes some of the issues which were identified. It is important to note that the information below identifies the number of issues found; not the number of findings. For example, if one individual was found to have a Medication Administration Record (MAR) which called for the administration of a medication for which a doctors order was not found AND was also found to have been given a medication twice a day when the doctor's order called for one time a day, that might be ONE finding regarding medication but TWO different issues.

As the numbers in the following chart show, the following issues were identified most frequently:

1. The Medication Administration Record (MAR), the Medication label and the Doctor's orders do not match;
2. Medication delivery instructions are unclear or the instructions are conflicting.
3. Per Federal recommendations, individuals have not received or consulted with their PCPs to determine the need for the Hepatitis B or C vaccine.

This information also helps identify agencies which may need the most support in this area. For example, Alta Mira had 14 issues in this area for the one person they serve in this review; Bright Horizons had an average of 7 issues per person for the two individuals they had in this review and Advantage Communications had 9 issues for the one person they serve in this review.

For health care coordination, oversight and monitoring, I/DD services rely heavily on nurses, primary care physicians and referrals to needed specialists. Nurses and the supports they can provide are essential for the protection and healthy living of class members. Relevant scored protocol questions related directly to nursing include:

Question #50: Was the eChat updated timely?

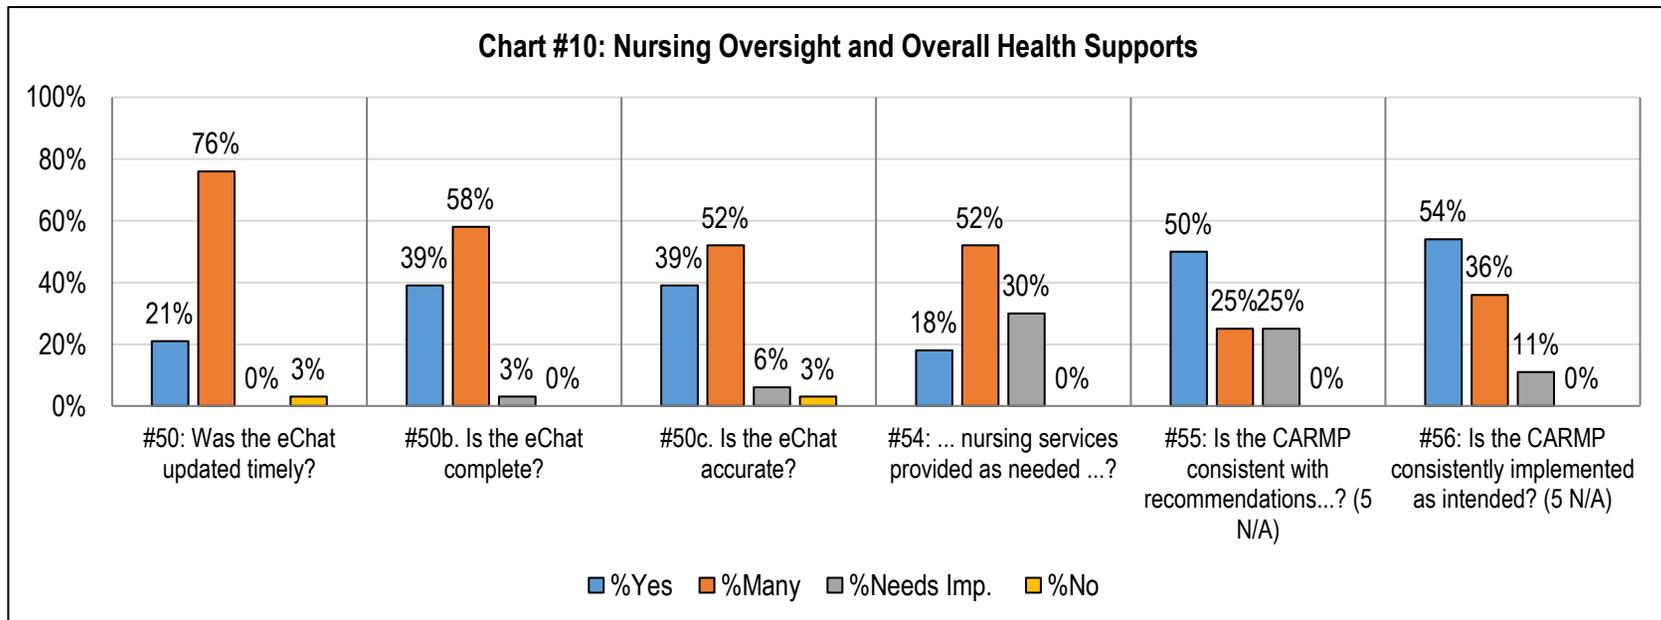

Question #50b: Is the eChat complete?

Question #50c: Is the eChat accurate?

Question #54: Are nursing services provided as needed by the individual?

Question #55: Is the CARMP consistent with recommendations in other healthcare documents?

Question #56: Is the CARMP consistently implemented as intended?

Oversight provided by nurses is a critical safeguard for Jackson Class Members, direct support professionals and their supervisors. The table below provides specific details, by Residential provider, of nursing related issues identified during the 2019 Metro IQR. Again, this represents the number of issues found; not the number of findings.

As the numbers in the following chart show, the following issues were identified most frequently:

1. The individual's Medical Emergency Response Plans (MERPs) and/or their Health Care Plans were not founded, not specific to the needs of the person and/or the information contained in these plans was incorrect.
2. The individual's Electronic Comprehensive Health Assessment Tool (eChat) contains incorrect information, is inconsistent with other documents and/or is not updated timely.
3. The individual's Comprehensive Aspiration Risk Management Plan (CARMP) was found to contain inaccurate information, incomplete information and/or the CARMP available to staff was not current.

This information also helps identify agencies which may need the most support in this area. For example, Alta Mira had 15 issues in this area for the one person they serve in this review; Bright Horizons has 25 issues identified in this area for the 2 people they serve in this review; ARCA had 53 issues for the 5 people they serve; and Adelante had an average of 10.2 issues per person for the 9 individuals they had in this review in this area.

In addition to the issues and questions noted above, the individual's nurse is responsible, with the assistance of the rest of the Team, to assure that the documents presented and created for planning, such as the ISP, are accurate and thorough and contain the needed plans and information required. The protocol questions related to ensuring this is done include:

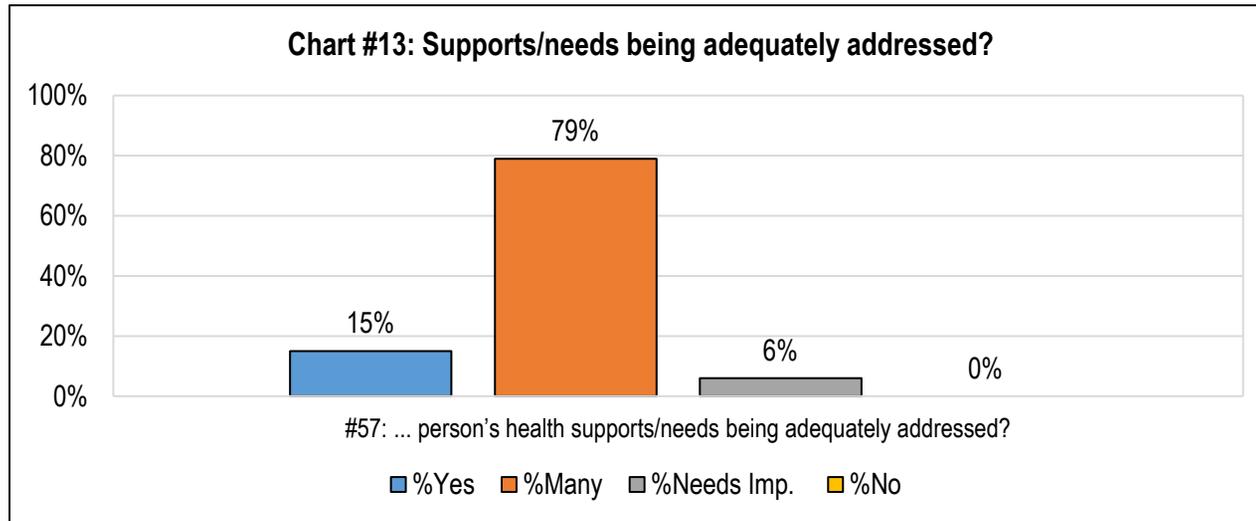

- Question #80: If needed, does the ISP contain a specific MERP?
- Question #81: Does the ISP contain information regarding primary health (medical) care?
- Question #81a: Does the ISP face sheet contain contact information listed in the ISP?
- Question #81b: Is the Health Care Coordinator's name and contact information listed in the ISP?

Overall, the ISP does contain correct contact information on the face sheet (91%), does contain information regarding primary health care (97%) and has the individuals Health Care Coordinator's name and contact information listed (94%).

There are many components to ensuring the health and safety of individuals with I/DD. These components vary and are unique to each individual. While the scored protocol questions cannot encompass each and every issue, it does allow for a general score that measures the adequacy of response to the individual's overall health needs. That question is **#57: Are the person's health supports/needs being adequately addressed?**

As noted in the chart below, for the 33 people scored in Metro Round 1 and Round 2 reviews, overall, five individuals had their health supports/needs adequately addressed (15% Yes). There were 26 people who had many of their needs addressed (79%) and two are receiving supports that need improvement (6%).

As noted earlier, beyond the scored protocol questions, the Findings Letters issued for each class member in a review provides person-specific detail about the issues which impact the answer to protocol question #57. This includes the adequacy and incorporation of needed tracking, ancillary support services, and other areas to ensure the health and safety of the individual being reviewed. Again, it is important to note that the indications are number of issues found; not the number of findings in the Findings letters. For example, if one individual had a finding that noted four different inconsistencies in that person's seizure tracking, that would be counted as a "4", for the number of issues, not just a "1" for the individual to whom the findings apply.

The largest number of issues found for Residential providers clustered in the following areas:

- Weight tracking (9)
- Bowel tracking (8)
- Fluid input/output (3)
- Vitals Tracking (2)
- Seizure Tracking (1)
- Repositioning (1)
- Psychiatric Symptoms (1)

Adequacy of therapy assessments and reports had the highest number of issues identified.

F. Adequacy of Planning, Adequacy of Services, Individual Service Plan

Before a plan can be implemented, it must first be created. The ISPs that provide details regarding the individuals' visions and outcomes are supposed to be developed by an Interdisciplinary Team that includes the Individual and those who know and provide supports to that person. This includes the Case Manager, Guardian, the Direct Support Staff, Therapists, Nurse, any additional invited by the class member and persons who are needed to ensure the implementation of the Plan. The 2019 IQR protocol specifically probes many of the aspects of the planning process, including detail of who participates in plan creation. The chart below lists answers to related questions in the 2019 Metro 1 & 2 reviews.

Question #63: Was the ISP developed by an appropriately constituted IDT?

Question #64: For any team members not physically present at the IDT meeting, is there evidence of their participation in the development of the ISP?

Question #32: Did the [day/employment] direct service staff have input into the person's ISP?

Question #40: Did the [residential] staff have input into the person's ISP?

Question #92: Was the person provided the assistance and support needed to participate meaningfully in the planning process?

One foundational component of an individual's ISP is the Long Term Vision, which summarizes what the individual wants to accomplish in the near future (3 to 5 years) in each life area. To that end, Outcomes are to be developed by the Team in a way that results in an accomplishable path to the visions. The 2019 IQR protocol specifically probes the content of identified visions as well as the content and clarity of related outcomes. The chart below details the findings related to the following identified questions related to class members ISP in the 2019 Metro 1 & 2 reviews.

- Question #66: Overall, does the long-term vision show expectations for growth and skill building?
- Question #160: Does the person have an ISP that contains a complete Vision Section that is based on a long term view?
- Question #67: Overall, does the ISP give adequate guidance to achieving the person's long-term vision?
- Question #75: Overall, are the ISP outcomes related to achieving the person's long-term vision?
- Question #76: Overall, do the ISP outcomes, action plans and T&SS address the person's major needs?
- Question #74: Overall, do the outcomes in the ISP include criteria by which the team can determine when the outcomes have been achieved?

Additional components of an individual's ISP include Action Steps, which should be written in measurable terms, in sequential order which logically leads to the achievement of the related outcome. The data gathered during the implementation of the Action Steps should also be written in measurable terms, so team members can review them and determine if measurable progress toward the outcome is being made. The chart below details the findings related to specific questions which probe the action steps and data collection intended to verify progress and opportunity for class members.

Question #68: Is measurable data kept which verifies the consistent implementation of each of the action steps?

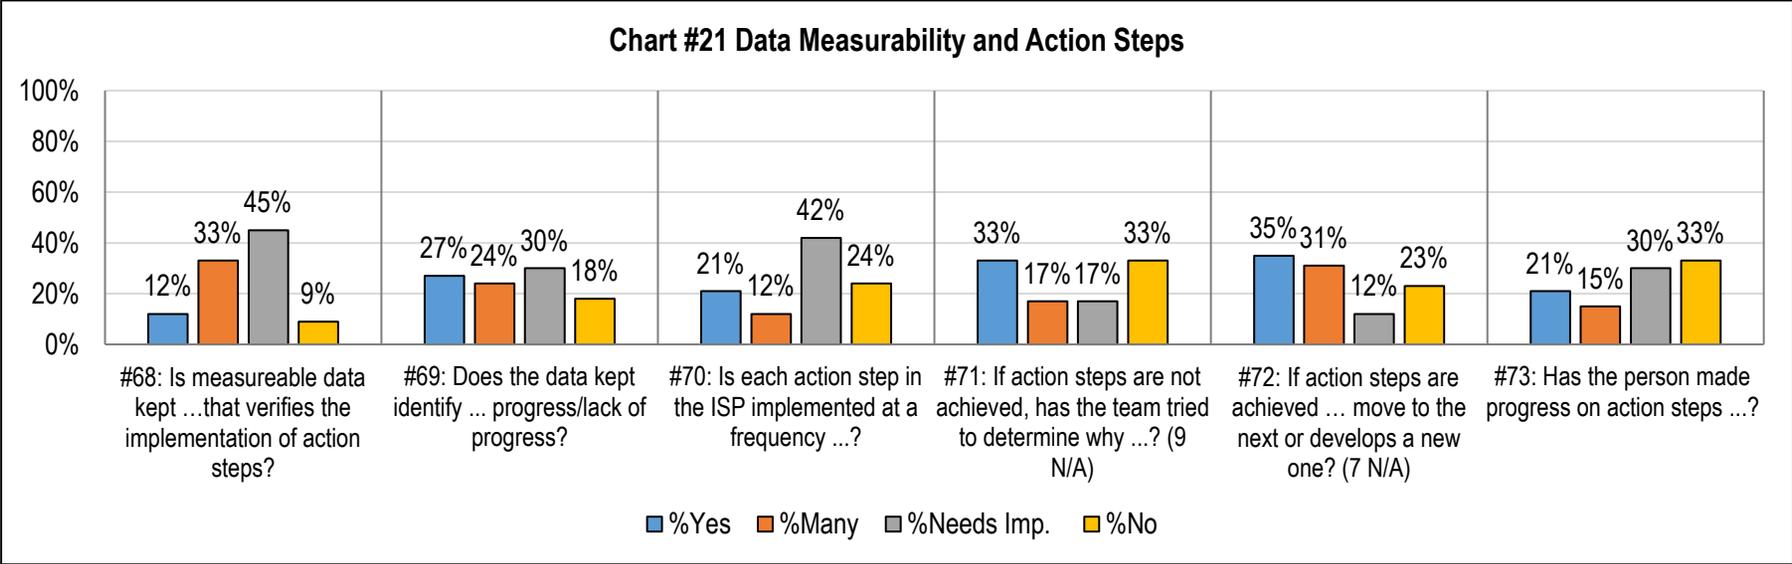

Question #69: Does the data kept identify what the person does so a determination can be made regarding the progress/lack of progress?

Question #70: Is each action step in the ISP implemented at a frequency that enables the person to learn new skills?

Question #71: If the person is not successful in achieving action steps, has the team tried to determine why, and change their approach as needed?

Question #72: If the person achieves action steps, does the team move to the next in a progress of steps or develops a new one?

Question #73: Has the person made measurable progress on action steps during the past year?

As these charts show, data collection needed to verify progress being made and/or the frequency with which the person has the opportunity to engage in his/her ISP Action Steps continues to be a significant issue for the majority of class members and the agencies which support them.

In addition to the components listed above, the Teaching and Support Strategies (T&SS) are also an integral part of the ISP. T&SS should be developed by the residential and/or day provider responsible for implementing the T&SS. Input from others such as therapists should be included as needed. WDSIs are developed by therapists as a

complement to the T&SS. All T&SS and WDSIs should provide guidance for those direct support professionals who support the person in achieving his/her Vision/Outcomes. The following protocol questions in the 2019 IQR relate to the T&SS and implementation of the ISP.

- Question #77: Are the T&SS sufficient to ensure consistent implementation of the services planned?
- Question #78: Are the recommendations and/or objectives/strategies of ancillary provider integrated into the ISP?
- Question #89: Were the direct service staff able to describe their responsibilities in providing daily care/supports to the person?
- Question #88: Was the direct service staff trained on the implementation of this person's ISP?
- Question #86/87a: Is the ISP being implemented?

As evidenced above, the different components of each person's ISP are evaluated. Based on that analysis, an overview of the adequacy of ISP content as well as implementation and effectiveness of the ISP can be determined. There are multiple questions in the 2019 IQR protocol that probe these items, and the level of intensity of services that individuals in the review receive.

- Question #65: Does my ISP contain current and accurate information?
- Question #124: Overall, has the IDT process been adequate for assessing, planning, implementing and monitoring of services for this person?
- Question #85: Overall, is the ISP adequate to meet the person's needs?
- Question #161: Does the person receive services and supports recommended in the ISP?
- Question #87b: Are current services adequate to meet the person's needs?
- Question #164: Is the total program of the level of intensity adequate to meet this person's needs?

G. Case Management

Case Management services are intended to be person-centered and are key to enabling people to pursue their desired life outcomes while gaining greater independence and access to needed services and supports. While the number of findings in the 2019 Metro Region Round 1 & 2 IQR in the Case Management area are the third highest of the findings area, the region scored well on, “does the case manager know the person” as pictured below. The charts below detail the related findings.

Question #24: Does the case manager “know” the person?

Question #25: Does the case manager understand his/her role/job?

Question #26: Is the case manager available to the person?%

Question #27: Was the case manager able to describe the person’s health related needs?

H. Supported Employment

Access to competitive integrated employment enables an individual to engage in community life, increase personal resources, improve self-sufficiency and contribute back to the community. The 2018 Waiver Standards emphasize that, “employment should be the first consideration. If someone does not choose employment, the decision should be based on informed choice”. Making an informed choice about employment is an individualized process. All people have unique histories and backgrounds, which means that some people may have limited experiences and will require more information to make a decision about employment while others may have a rich and varied employment history and can make an informed choice based on that history.

There are multiple components that make up the process of ensuring Informed Choice. These are probed as part of the Individual Quality Review, and detailed in the tables below. As the 2018 DD Waiver Standards emphasize,

2018 DD Waiver Standards Chapter 4.5... “Person-centered practice must include informed choice. Informed choice is when a person makes a decision based on a solid understanding of all available options and consequences of how that choice will impact his/her life. Options are developed through a partnership with the person and knowledgeable supports, including team members and nonpaid supports who empower the person to make informed choices. Informed choice is critical in PCP and can move the lives of people with I/DD forward.

Informed choice generally includes the following:

Also, the following contains information from 2018 DD Waiver Standards Chapter 4.5 and 6.6.3.4

1. **Assessment:** The first step in making an informed choice about employment starts with the assessment process.
2. **Information:** discussing with the person/guardian what was learned through the assessment (4.5) is also expected and helpful. In addition, providing information about different work options and resources available to the person in a way that is understandable by the person is important.
3. **Experience:** If a person has no volunteer or work history, then the individual and guardian should consider trying new discovery experiences in the community to determine interests, skills, abilities, and needs. Opportunity for Trial Work or Volunteering: ... providing the individual with access to job exploration activities including volunteer work and/or trial work opportunities, if the individual and guardian are interested, is key.
4. **Identification of barriers:** considering potential impact on the person’s life, health and safety and creating strategies to address any related issues that may arise.

The IQR Questions related to these four Informed Choice areas and the results follow.

1. **Components of Informed Choice: Assessment**

Question #125. Does (Name) have a current Person Centered Assessment?

Question #126. Did this assessment address vocational interests, abilities and needs?

Question #127. Did the individual participate personally in the Person Centered Assessment?

Question #128. Did the Guardian participate in the Person Centered Assessment?

Question #129. Is the individual engaged in the Informed Choice Project?
