# 2003 New Mexico Youth Risk and Resiliency Survey (YRRS) County Level Results

#### McKinley County

#### Introduction

This report contains county-level results from the 2003 New Mexico Youth Risk and Resiliency Survey (YRRS), a statewide survey of public school students, grades 9-12. A companion document, 2003 New Mexico Youth Risk and Resiliency Survey: Statewide Results, presents results for the state. Together, these documents comprise a useful tool for those working on youth-related issues at the state and local level.

The YRRS is organized into two major content areas: risk behaviors and resiliency factors. Risk behaviors include behaviors associated with personal safety, violence, depression and suicidal ideation, tobacco use, alcohol use, drug use, sexual activity, physical activity, and nutrition (Appendix A). Resiliency factors, or protective factors, are measures of the positive and supportive relationships, experiences, activities, and values that encourage healthy youth development. Resiliency factors include caring and supportive relationships in the family, school, community and with peers; boundaries and expectations set by the family, school, and community; positive peer support; meaningful participation/constructive use of time; commitment to learning; life skills/social competencies; and perception of community norms related to alcohol use by high school age youth (Appendix B).

#### **How to Read this Report**

This report has three main sections, each of which consists of a set of bar charts. The first section presents the results of the major risk behaviors examined in the survey. Each category of risk behavior is presented as a pair of two bar charts. The first chart compares results for the county to results for the entire state, and the second compares the risk behaviors of boys to those of girls within the county. All risk behaviors are defined in Appendix A.

------

NOTE: County level YRRS reports are freely available. School district reports have been distributed to school district offices. School districts are encouraged to reproduce and share these reports with community groups concerned with prevention and health promotion. However, school district level results will not be released without express permission of the school district superintendent.

The second section presents the results of the resiliency section of the survey. As with the risk behaviors, each set of resiliency factors is presented with two charts, one comparing the county to the state, and the other comparing boys to girls within the county.

The third section explores the relationship between each resiliency factor and each of four different risk factors. This section presents results for the state as a whole, rather than for the county. As can be seen repeatedly, students with resiliency factors were less likely to engage in risky behaviors than those who did not have the resiliency factors.

The third section of the report is followed by a chart illustrating the relationships between selected risk behaviors and the academic success of students (academic success in indicated when students report they receive mostly A's and B's in their classes). Results show that students who do not engage in risky behaviors are more likely to report academic success.

#### **Understanding The Charts, and A Word about Error Bars**

The bar charts in this report present the percentage of students who reported engaging in any given risk behavior or who reported having any given resiliency factor. The height of the bars conveys the approximate percentage reporting each trait, and provides a quick visual comparison between different groups of students reporting that trait. Underneath each set of bars is a table that presents the percentage of students who reported each trait. For instance, the chart on page 8, Vehicle Safety, shows that 11.5% of students in New Mexico rarely or never wear seatbelts, while 10% of students in McKinley do the same.

Because of the high cost and logistical complications involved in conducting a statewide survey, the YRRS was administered to a sample of students, rather than to every single student in each school district. Because YRRS data are about a *sample* of students, and not the entire student body, the results in this report are *estimates*. As with all estimates, there is some uncertainty associated with each of these estimates. On the charts in this report, this degree of uncertainty is represented by an error bar (or confidence interval). The error bar is the thin 'I' shaped line that extends above and below the end of each bar in a chart. One of the major influences on the confidence interval or error bar is the number of participants in the survey. In general, this means that with more students participating in the survey, there will be a higher degree of confidence in the results (i.e., error bars will be smaller).

The proper interpretation of an error bar can be illustrated by looking at the chart on page 46. This chart illustrates the relationship between various risk factors and the resiliency factor, Caring and Supportive Relationships in the Family. The chart demonstrates that among students with the resiliency factor, 25.5% were current smokers, while among those without the resiliency factor, 38.7% were current smokers. The error bar for the estimate of those with the resiliency factor (25.5%) extends approximately 2.5 percentage points in either direction, meaning that we are confident that the actual percentage of smokers in this group of students was between 23.0% and 28.0%. The error bar for the estimate of those without the resiliency factor (38.7%) extends approximately 4 percentage points in either direction, so we are confident that the actual percentage of smokers among this group was between 34.7% and 42.7%.

How does knowing the upper and lower limits of our error bars help us? In the same example, the error bar for those with the resiliency factor extends from 23.0% to 28.0%, and the error bar for those without the resiliency factor extends from 34.7% to 42.7%. Because these two intervals do not overlap, we have a high degree of confidence that those with the resiliency factor are less likely to be smokers than those without the resiliency factor. The same can be visually confirmed by looking at the error bars themselves on the bar charts--the error bars do not overlap, therefore we are confident that students in one group were less likely to be current smokers than students in the other group.

The importance of the error bar is further demonstrated in the chart on page 47. Of those with the resiliency factor, Caring and Supportive Relationships in the School, 26.7% reported being current smokers. Of those without the resiliency factor, 32.8% reported being current smokers. While at first it appears that there may be an important difference between those with and without the resiliency factor with regard to smoking cigarettes, it is also apparent that the error bars for these two groups overlap. In this case, we cannot confidently say that those with the resiliency factor were less likely to be smokers than those without the resiliency factor. In other words, the estimates (26.7% and 32.8%) are not statistically different from each other.

For some small counties, error bars have been removed from this report. In small counties, the number of students sampled can approach the total student population. In these cases, error bars have limited meaning because with a high percentage of students surveyed, there is less uncertainty around the estimates than error bars suggest.

#### Methodology

The YRRS was implemented in fall and spring semesters of the 2003-2004 school year. All public school districts in New Mexico were invited to participate in the 2003 YRRS. Of 89 districts statewide, 71 districts participated. From each participating school district, schools with students from 9th to 12th grades were selected to participate. The probability of selection of each school was proportional to the size of its 9th-12th grade population. In large school districts, this meant that only some of the schools were selected to participate, while in small districts, all schools were selected. Classrooms were systematically selected from each school, and all students in each selected classroom were asked to participate.

In each participating school, a single day was arranged on which to administer the survey. Questionnaire forms and pencils were distributed to each student in participating classes, and students were asked to fill out the questionnaires independently of other students and without teacher assistance.

Questionnaires were electronically scanned, and data were analyzed using STATA 8.2, a statistical software program.

#### Limitations of the YRRS

All information from the YRRS was self-reported by the participating students. While most questions on the YRRS come from nationally validated surveys, and data quality has been demonstrated to be very high in national surveys, there is no way to guarantee the truthfulness of the participants in any survey that relies on self-reporting.

A good response rate is one of the most important goals in conducting a survey. At the school district level, a response rate is the percentage of all students selected for the survey who complete and return a useable questionnaire form. At the state level, the response rate incorporates the participation of school districts and schools as well as the participation of students. An adequate response rate means that survey results are more likely to represent the statewide grade 9-12 public school population. The statewide response rate for the 2003 YRRS was 56%, just short of our target of 60%.

In order to achieve a 60% statewide response rate, we aimed for a 75% response rate from each participating school district. Most participating school districts met this target or were close to it, with response rates ranging from 15% to 96%. While the response rate was generally very good in participating schools, the weakness in the statewide response rate stemmed from entire school districts and schools declining to participate.

#### **Participation in McKinley County**

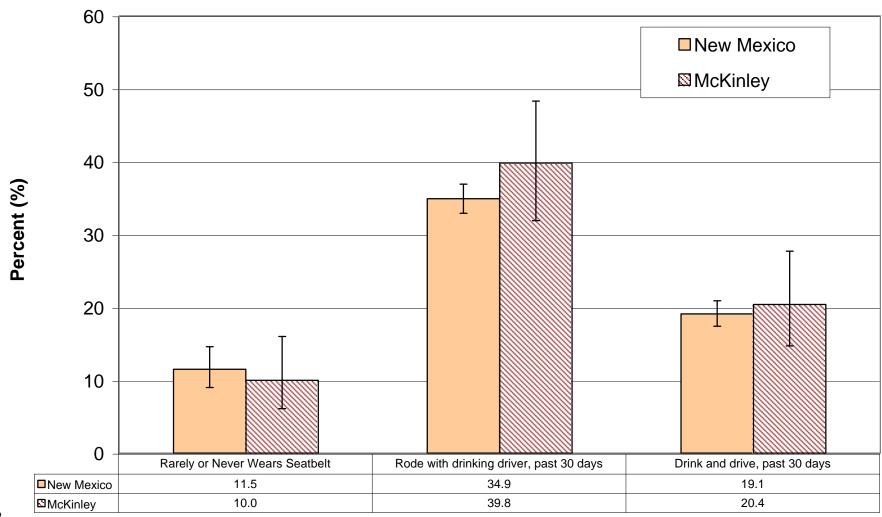

The response rate in McKinley County was 55%.

A high response rate produces survey results that are more representative of the student population. A response rate of at least 60% allows generalization of results to the entire student body. A response rate of 75% is excellent and allows a high degree of confidence in results. Because a high response rate means that more students have been surveyed, a high response rate will also be reflected in the error bars (i.e., with a higher response rate and more students included in the survey, error bars will be smaller and confidence intervals will be narrower). Response rates below 60% are considered low, and caution should be exercised in interpreting results. Low response rates indicate that the data is likely only representative of students who participated in the survey and may not necessarily represent the entire student body.

#### Appendix A: Definitions of Risk Behaviors

#### Vehicle Safety

Rarely or Never Wears Seatbelt

Answered 'Rarely' or 'Never' to the question, How often do you wear a seat belt when riding in a car driven by someone else?

Rode with drinking driver in past 30 days

Answered one or more times to the question, During the past 30 days, how many times did you ride in a car or other vehicle driven by someone who had been drinking alcohol?

Drink and drive in past 30 days

Answered one or more times to the question, During the past 30 days, how many times did you drive a car or other vehicle when you had been drinking alcohol?

#### Violence-Related Behaviors

Carried weapon in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you carry a weapon such as a gun, knife, or club?

Carried a gun in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you carry a gun?

Carried a weapon at school in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you carry a weapon such as a gun, knife, or club on school property?

In a physical fight in past 12 months

Answered one or more times to the question, During the past 12 months, how many times were vou in a physical fight?

In a physical fight at school in past 12 months

Answered one or more times to the question, During the past 12 months, how many times were you in a physical fight on school property?

#### Violence-Related Behaviors: Victimization

Skipped school because felt unsafe in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you not go to school because you felt you would be unsafe at school or on your way to or from school?

Answered one or more times to the question, During the past 12 months, how many times has someone threatened or injured you with a weapon such as a gun, knife, or club on school property?

Physically hurt by boy/girlfriend n last 12 months

Answered 'Yes' to the question, During the past 12 months, did your boyfriend or girlfriend ever hit, slap, or physically hurt you on purpose?

Ever physically forced to have sexual intercourse

Answered 'Yes' to the question, Have you ever been physically forced to have sexual intercourse when you did not want to?

#### Depression and Suicidal Ideation

Felt sad and hopeless every day for two weeks in past year

Answered 'Yes' to the question, During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities?

#### Seriously considered suicide in past year

Answered 'Yes' to the question. During the past 12 months. did vou ever seriously consider Made a suicide plan in the past year

Answered 'Yes' to the question, During the past 12 months, did you make a plan about how you would attempt suicide?

Attempted suicide in past year

Answered one or more time to the question, During the past 12 months, how many times did you actually attempt suicide?

Injured as result of suicide attempt

Answered 'Yes' to the question, If you attempted suicide during the past 12 months, did any attempt result in an injury, poisoning, or overdose that had to be treated by a doctor or nurse?

#### Cigarette Smoking

Ever tried cigarettes, even a puff

Answered 'Yes' to the question, Have you ever tried cigarette smoking, even one or two puffs?

First smoked a cigarette at age 12 or under

Answered 12 years old or younger to the question, How old were you when you smoked a whole cigarette for the first time?

Current Smoker: Smoked in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you smoke cigarettes?

Frequent Smoker: Smoked on 20 of past 30 days

Answered 20 or more days to the question, During the past 30 days, on how many days did you smoke cigarettes?

Smoked at school in past 30 days

Answered *one or more days* to the question, During the past 30 days, on how many days did you smoke cigarettes on school property?

Bought cigarettes in a store in past 30 days

Answered 'I bought them in a store such as a convenience store, supermarket, discount store, or gas station' to the question, During the past 30 days, how did you usually get your own cigarettes? (Select only one response.)

#### Other Tobacco Use

Smoked cigars, cigarillos, or little cigars in past 30 days

Answered *one or more days* to the question, During the past 30 days, on how many days did you smoke cigars, cigarillos, or little cigars?

Used smokeless tobacco in past 30 days

Answered 'one or more days' to the question, During the past 30 days, on how many days did you use chewing tobacco, snuff, or dip, such as Redman, Levi Garrett, Beechnut, Skoal, Skoal Bandits, or Copenhagen?

Used any form of tobacco in past 30 days

Respondent reported any form of tobacco use in the previous 30 days (i.e., smoking cigarettes, cigars, cigarillos, or little cigars, or using smokeless tobacco).

In room with someone who was smoking in past week

Answered one or more days to the question, During the past 7 days, on how many days were you in the same room with someone who was smoking cigarettes?

#### Alcohol Use

Ever had a drink of alcohol in lifetime

Gave any response other than 'I have never had a drink of alcohol other than a few sips' to the question, How old were you when you had your first drink of alcohol other than a few sips?

Had drink of alcohol in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you have at least one drink of alcohol?

Binge drinking\* in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you have 5 or more drinks of alcohol in a row, that is, within a couple of hours?

Had a drink of alcohol at school in past 30 days

Answered one or more days to the question, During the past 30 days, on how many days did you have at least one drink of alcohol on school property?

First drink of alcohol at age 12 or younger

Answered 12 years old or younger to the question, How old were you when you had your first drink of alcohol other than a few sips?

#### Marijuana Use

Used marijuana in past 30 days

Answered one or more days to the question, During the past 30 days, how many times did you use marijuana?

Used marijuana at school in past 30 days

Answered one or more days to the question, During the past 30 days, how many times did you use marijuana on school property?

First used marijuana at age 12 or younger

Answered 12 years old or younger to the question, How old were you when you tried marijuana for the first time?

#### Other Drug Use

Used cocaine in past 30 days

Answered one or more times to the question, During the past 30 days, how many times did you use any form of cocaine, including powder, crack, or freebase?

Used inhalants in past 30 days

Answered one or more times to the question, During the past 30 days, how many times have you sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high?

Used heroin in past 12 months

Answered one or more times to the question, During the past 12 months, how many times have you used heroin (also called smack, junk, or China White)?

Used methamphetamines in past 12 months

Answered one or more times to the question, During the past 12 months, how many times have you used methamphetamines (also called speed, crystal, crank, or ice)?

Used ecstasy in past 12 months

Answered one or more times to the question, During the past 12 months, how many times have you used ecstasy?

Injected illegal drugs with needle in lifetime

Answered one or more times to the question, During your life, how many times have you used a needle to inject any illegal drug into your body?

Been offered illegal drugs at school in past 12 months

Answered 'Yes' to the question, During the past 12 months, has anyone offered, sold, or given you an illegal drug on school property?

#### Sexual Activity

#### Ever had sexual intercourse

Gave any respons other than 'I have never had sexual intercourse' to the question, How old were you when you had sexual intercourse for the first time?

#### Currently Sexually Active

Respondent reported having sexual intercourse within the previous 3 months. Answered *one or more people* to the question, *During the past 3 months, with how many people did you have sexual intercourse?* 

#### First sexual intercourse at age 12 or younger

Answered 12 years old or younger to the question, How old were you when you had sexual intercourse for the first time?

#### Used alcohol or drugs before last sexual intercourse

Answered 'Yes' to the question, Did you drink alcohol or use drugs before you had sexual intercourse the last time?

#### Had sexual intercourse without using condom

Answered 'No' to the question, The last time you had sexual intercourse, did you or your partner use a condom?

#### Sexually Responsible

Respondent reported either never having had sexual intercourse, not having sexual intercourse within the previous 3 months, or using a condom the last time she/he had sexual intercourse.

#### Uses BCP as primary pregnancy prevention

Answered 'Birth control pills' to the question, The last time you had sexual intercourse, what one method did you or your partner use to prevent pregnancy? (Select only one response.)

#### **Body Weight and Weight Control**

#### Overweight and At risk of overweight

Body Mass Index (BMI) was calculated from self-reported height and weight. The categories 'Overweight' and 'At risk of overweight' were based on age- and sex-specific BMI values. These values were determined from national, multi-year height, weight, and BMI data.

At risk of Overweight: Greater than or equal to the 85th national BMI percentile for age and sex, and less than the 95th percentile.

Overweight: Greater than or equal to the 95th national BMI percentile for age and sex.

#### Exercised for weight control in last 30 days

Answered 'Yes' to the question, During the past 30 days, did you exercise to lose weight or to keep from gaining weight?

#### Ate less for weight control in last 30 days

Answered 'Yes' to the question, During the past 30 days, did you eat less food, fewer calories, or foods low in fat to lose weight or to keep from gaining weight?

#### Vomited or used laxatives for weight control in last 30 days

Answered 'Yes' to the question, During the past 30 days, did you vomit or take laxatives to lose weight or to keep from gaining weight?

#### Physical Activity and Nutrition

Does not eat five fruit or vegetable servings a day

Reported consuming fewer than five daily servings of fruit juice, fruit, green salad, potatoes, carrots, or other vegetables over the previous five days.

Did not do minimum recommended moderate or vigorous physical activity\*

Reported less than 20 minutes of vigorous activity on 3 of the last 7 days and less than 30 minutes of moderate activity on 5 of the last 7 days.

Answered 2 days or less to the question, On how many of the past 7 days did you exercise or participate in physical activity for at least 20 minutes that made you sweat and breathe hard, such as basketball, soccer, running, swimming laps, fast bicycling, , fast dancing, or similar aerobic activities?

AND

Answered 4 days or less to the question, On how many of the past 7 days did you participate in physical activity for at least 30 minutes that did not make you sweat or breathe hard, such as fast walking, slow bicycling, skating, pushing a lawn mower, or mopping floors?

No moderate or vigorous physical activity

Reported no vigorous activity in the last 7 days and no moderate activity in the last 7 days.

Answered '0 days' to the question, On how many of the past 7 days did you exercise or participate in physical activity for at least 20 minutes that made you sweat and breathe hard, such as basketball, soccer, running, swimming laps, fast bicycling, , fast dancing, or similar aerobic activities?

AND

Answered '0 days' to the question, On how many of the past 7 days did you participate in physical activity for at least 30 minutes that did not make you sweat or breathe hard, such as fast walking, slow bicycling, skating, pushing a lawn mower, or mopping floors?

Watches TV 3 or more hours a day on a school day

Answered 3 hours per day or more to the question, On an average school day, how many hours do you watch TV?

Does not have daily PE at school

Answered less than 5 hours per day to the question, In an average week when you are in school, on how many days do you go to physical education (PE) classes?

#### Health Care Utilization and Special Needs

Had physical examination in past year

Answered 'Within the last 12 months' to the question, When did you last have a physical exam?

Used school-based health center this year

Answered one or more times to the question, If your school has a school-based health center, how many times did you use it for services this year?

Limited Activity due to impairment or health problem

Answered 'Yes' to the question, Are you limited in any way in any activities because of any impairment or health problem?

Speaks a language other than English at home at least half of time

Answered 'About half the time' or more often to the question, How often do you speak a language other than English at home?

Not enough food to eat in family sometimes or most of the time

Answered 'Sometimes not enough food to eat' or 'Often not enough food to eat' to the question, During the past 12 months, which of the following statements best describes the food eaten by you and your family?

#### Appendix B: Definitions of Resiliency Factors

Each resiliency factor is briefly described below. The measure of resiliency is constructed from the responses to the survey questions listed below its description.

#### Caring and Supportive Relationships

Caring and supportive relationships refer to the interactions between youth and parents, peers, and adults in the school and community that convey love, acceptance, and affirmation. These resiliency factors are constructed from responses to the following survey questions.

Parent or other adult in the family

How true do you feel these statements are for you?
