Perinatal Exposure	N/A	N/A	N/A
No Identified Risk	10	45.5	N/A

**Footnotes**

\* Count comprised of all NM residents ≥ 13 years with newly diagnosed HIV infection Stages 1 through 3 in 2024.

\*\* Proportions may not sum up to 100% due to rounding.

\*\*\* Rates per 100,000 based on the Department of Health New Mexico Indicator-Based Information System's population estimates for 2024. Small numbers (<20) in some calculations may lead to statistical unreliability in rates, interpret with caution.

**Note:** HIV population is dynamic. Counts, proportions, and rates subject to constant changes upon additional findings, reports, and outreaches. Data presented in this report provides an approximation of NM residents with HIV, it likely underrepresents the true figures.

**Region:** NM Department of Health reconstructed the public health regions in 2012, comparisons to previous years is not recommended. New regional layout available at <https://ibis.health.state.nm.us/view/docs/HealthRegions2012.pdf>.

**Marginalized Population:** To protect the safety of marginalized communities, state-level data for some populations are not shown. This decision reflects NMHealth's commitment to preventing data misuse and ensuring that information is not used to cause harm.
