

**NM DRUG OVERDOSE PREVENTION QUARTERLY MEASURES REPORT
THIRD QUARTER OF 2023 (2023Q3)**

**Substance Use Epidemiology Section
Prescription Drug Overdose Prevention Program
Injury and Behavioral Epidemiology Bureau
Epidemiology and Response Division**

This report is produced quarterly to track indicators related to drug overdose prevention. The indicators reported here allow for the tracking of three key interventions for prescription drug overdose: improving prescribing of controlled substances, increasing the availability of treatment for opioid dependence, and the increasing availability of naloxone in the community.

This report is based on calendar quarters: Q1 is January-March of the calendar year.

Data for this report were drawn from several sources:

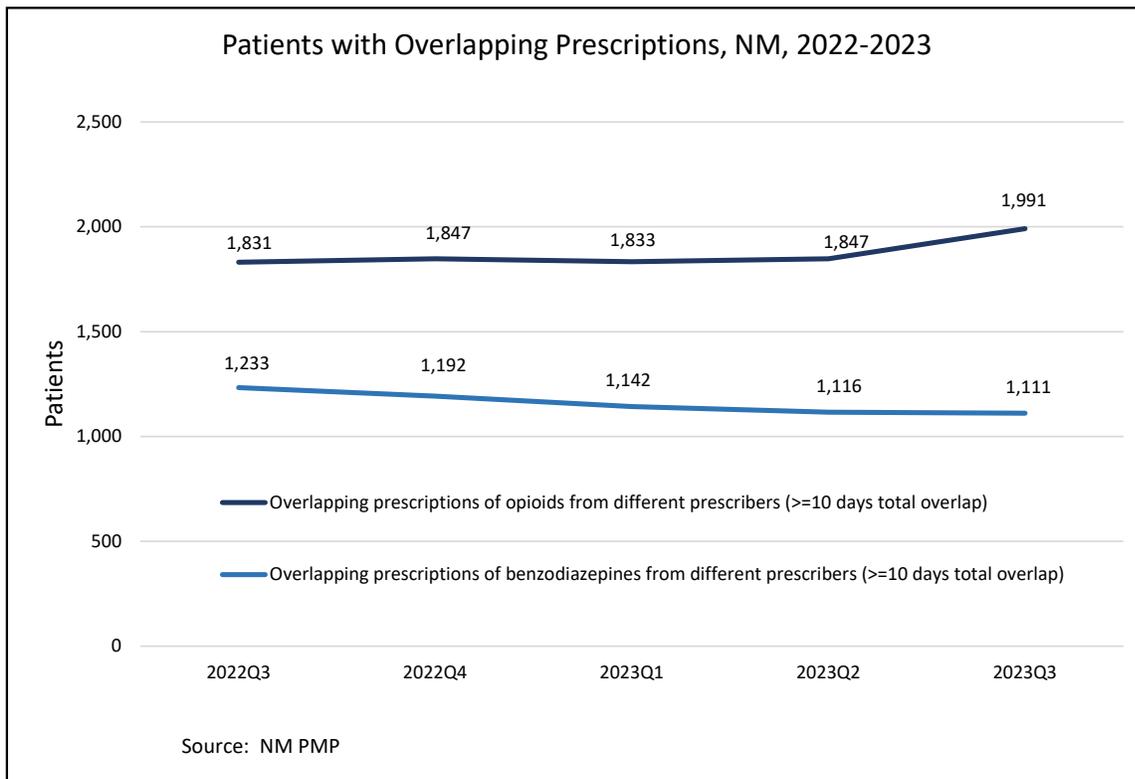

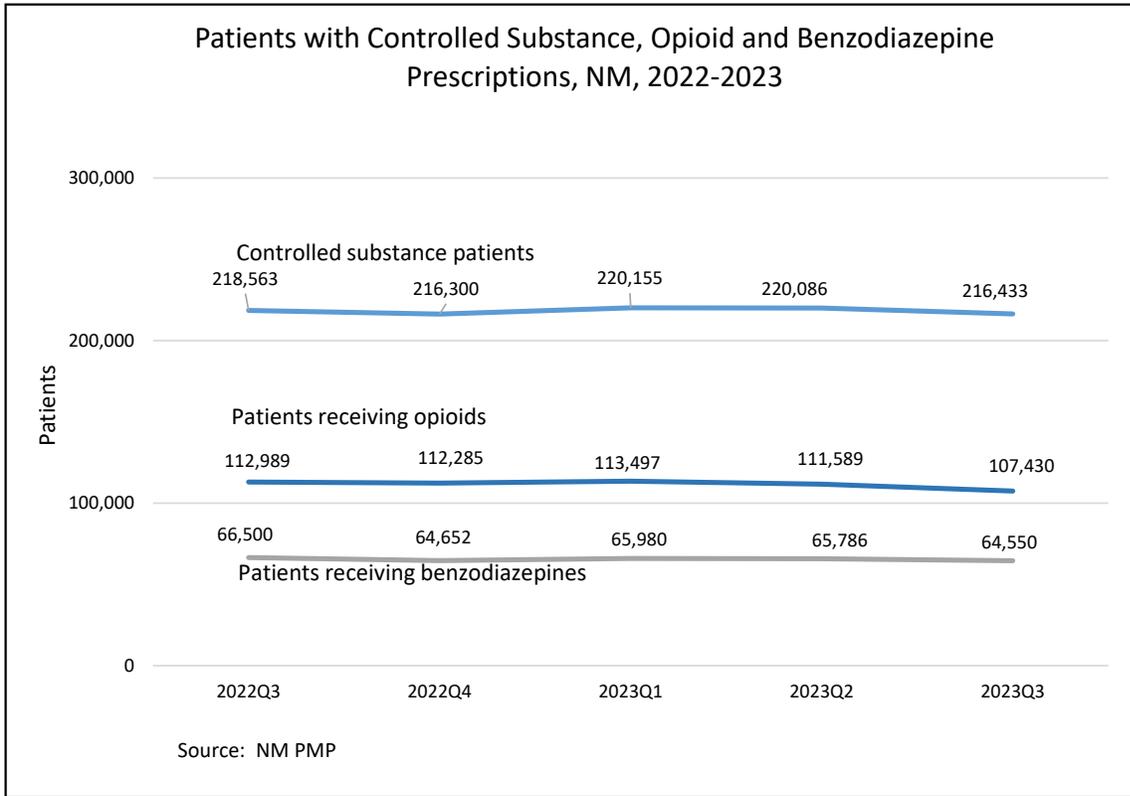

1. The Prescription Monitoring Program (PMP) operated by the NM Board of Pharmacy, which collects data on every controlled substance prescription filled in New Mexico.
2. New Mexico Medicaid in the Human Services Department, for data on methadone treatment paid by Medicaid, and for data on claims paid for naloxone prescriptions at pharmacies.
3. The State Opioid Treatment Authority in the Human Services Department for data on methadone treatment programs operating in New Mexico.
4. The NM Department of Health Syringe Services Program for data on naloxone distributed via syringe exchange sites.
5. The Behavioral Health Services Division in the Human Services Department for data on naloxone distributed through Office of Substance Abuse Prevention programs.

Reports for 2020 Q2 and after reflect a changed definition of medication assisted treatment (MAT). The older definition defined MAT as buprenorphine/naloxone combination products only. The new definition has been applied to all quarters included in this report and includes all buprenorphine products except a couple of types indicated for the treatment of pain. Because MAT products are usually high-dose prescriptions and are counted separately from other opioids, this change has an effect on many of the indicators in this report.

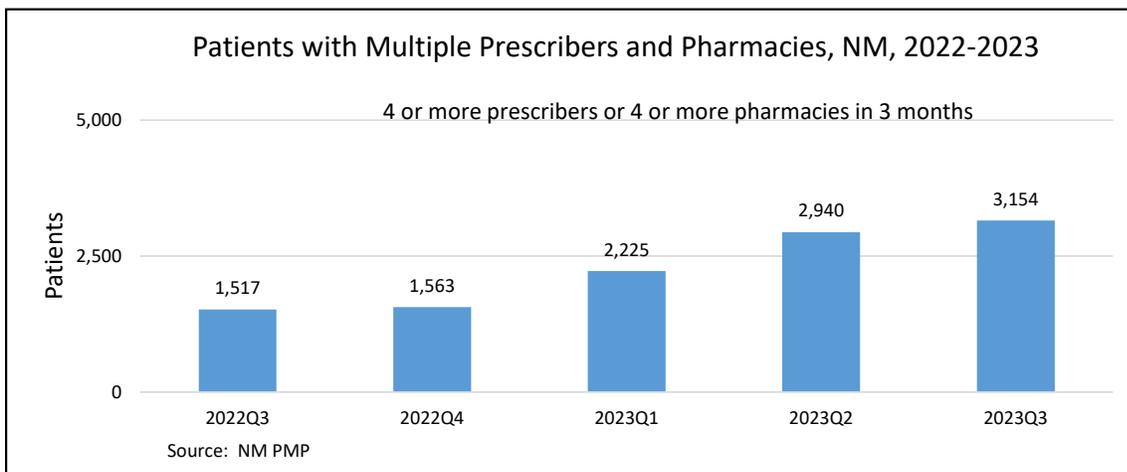

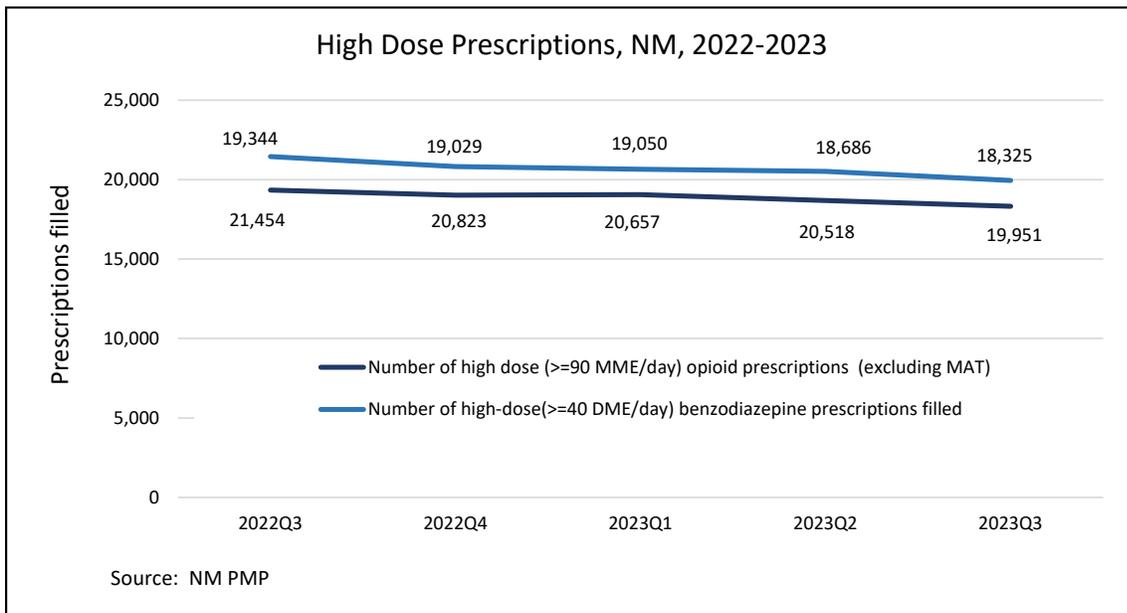

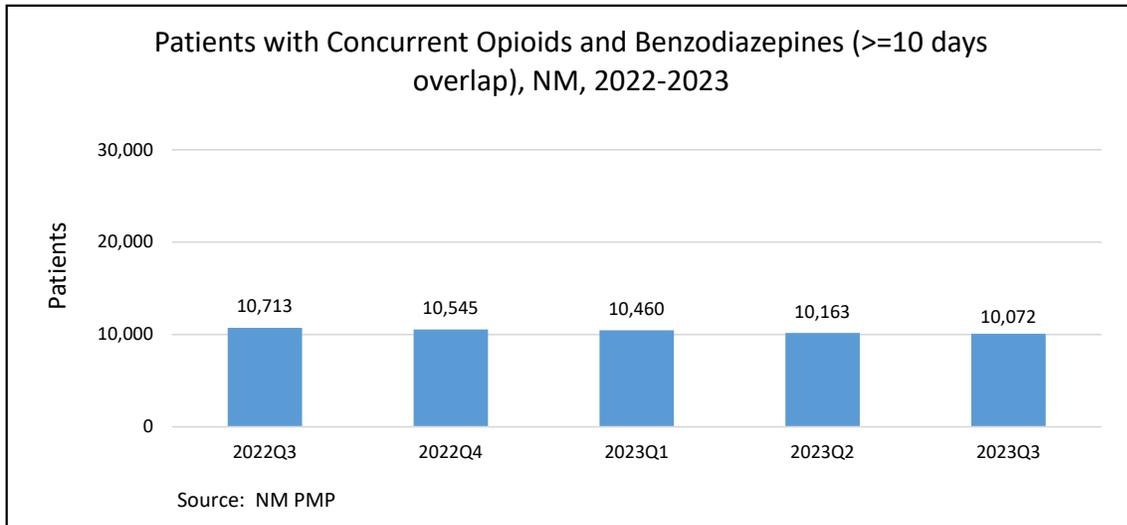

Prior to 2020 Q4, a number of controlled substances were excluded from the analyses that are the basis of this report. These included the barbiturates and some miscellaneous controlled substances (notably testosterone and pregabalin). The inclusion of these drugs increased the number of controlled substance patients and providers reported, and increased the number of patients with multiple providers or pharmacies. Most other indicators were not affected.

Gabapentin was added to PMP reporting as a drug of concern in March 2023. This caused increases in the number of prescribers with 20+ patients, the number of patients with multiple providers. Most other indicators were not affected.

Year and Quarter	2022Q3	2023Q2	2023Q3	Quarterly % Change 2023Q2 vs 2023Q3	Quarterly % Change 2022Q3 vs 2023Q3
Pharmacies Presenting Medicaid Naloxone Claims+	251	252	218	-13.5%	-13.1%
Number of Medicaid Naloxone Claims Processed	2,799	1,137	262	-77.0%	-90.6%

*Some naloxone doses were given to organizations and may not have been distributed in that quarter.

**Reported Reversals are not necessarily individual level data, as one person could have overdosed and been reversed more than once. Data on reversals are combined across several agencies and programs, and the definition of a reversal may vary.

+An outpatient pharmacy could present claims in more than one quarter. The total number was obtained by counting each pharmacy once. There were 286 outpatient Pharmacies with a NM address in 2019 according to the Board of Pharmacy.
