Trauma and Critical Care Conference

February 25 – February 26, 2016

This conference is presented by
San Juan Regional Medical Center

 SAN JUAN REGIONAL
MEDICAL CENTER

sanjuanregional.com/trauma

We have a whole lineup of great sessions and speakers planned over the two-day span, including astronaut Robert Curbeam. Curbeam's session on Friday, February 26, "Space Missions and Life in Space" will focus on the lessons he's learned working under pressure during his tenure with NASA. He served on three space shuttle missions and performed seven spacewalks, and is currently tied for the record for the most spacewalks during a single spaceflight, with four during the STS-116 mission.

Pre-conference Workshop Trauma Care After Resuscitation February 22 – February 24, 2016

This course provides acute care, critical care, and perioperative nurses the foundational, evidence based information and critical thinking skills necessary to care for the hospitalized trauma patient. TCAR covers a wide range of pathophysiologic and nursing concepts and is designed to be a broad, core level program, rather than an advanced or specialty area specific course.

February 22 through February 24 0800 - 1630
San Juan College, Henderson Fine Arts Building
4601 College Boulevard | Farmington, New Mexico \$250
