<p>\$83,850.00</p>	<p>Interactive Recreational Support for Community Members with Dementia and other Progressive Cognitive Challenges</p>	<ol style="list-style-type: none"> <li>1. Working with Ideum (an interactive technology group with studios and offices in Corrales, NM), select the technology platform best suited for placement in a Long Term Care (LTC) setting. Criteria identified as necessary include: moveable device; technology must be sustainable in the methods of programming to keep content appropriate as needed for residents suffering with Dementia and other cognitive challenges.</li> <li>2. Design programs geared towards large, small group and individual resident recreational needs: music, games, reminiscing, travel and current events with an eye to increase resident participation in community activities.</li> <li>3. Implement evaluative methods:</li> </ol>	<p>Uptown Rehabilitation Center</p>	<p>Quality of Care, Quality of Life, Training, Other</p>	

		documentation of increased resident participation, train staff in utilizing technology appropriately with residents.			
\$37,800.85	<b>PRIME: Promoting Resident Health Through Meaningful Engagement</b>	<b>The iN2L Program (It's Never 2 Late) which includes engagement technology (computer system) that provides access to thousands of activity and communication applications. Use of this technology can enable quality of life, cognitive stimulation, physical stimulation, and socialization for senior living residents. In addition, training our staff will provide them with new skills to enhance resident/caregiver interactions. Continued program supporting, in the long term, will result in the reduction of health care costs. The goals of the project are to: 1) improve the quality of life (QOL) of our residents by providing activities that address the needs and strengths of the individual, and 2) enrich our residents' social connections by providing communication opportunities to stay connected to their families, friends, and the community at large.</b>	<b>Bear Canyon Rehabilitation Center</b>		

\$94,219.76	Fundamentals of Infection Prevention for Long Term care Facilities in New Mexico	Provide Fundamentals of Infection Prevention for Long Term Care training to currently designated Infection Preventionist (or designee) in New Mexico (NM) long-term care (LTC) facilities. The purpose of the Fundamentals project is to increase long-term care staff competency in infection control and prevention, surveillance, and reporting, leading to improved patient safety, reduced performance deficiencies, and increased compliance with the Centers for Medicare and Medicaid (CMS) regulations (42 CFR §483.80).	Infection Control Consultants of New Mexico, LLC	Training and Quality of Life	
\$2,788.00	Validation- The Feil Method	Provide staff training of The Feil Method (validation) which is a tested model of practice that helps old disoriented people reduce stress, enhance dignity and happiness.	Sierra Healthcare	Quality of Life	
\$1,335.00	Helping Families and Residents Druing the End of Life Phase Project	Obtain universally recognized literature to assist residents and families during the end of life phase of an individual. This booklet series by Barbara Karnes is an all-ages approach to easing anxieties and educating individuals and families about the end of life phase of a person's life, and as such is an invaluable resource.	Skies Healthcare and Rehabilitation	Quality of Life, Consumer Information, Transition Preparation
