

New Mexico Asthma Control Program

Community Health Workers Asthma Speciality Training

12 CEU Credits

The goal of this training is to improve knowledge, skills and understanding among Community Health Workers of the basic educational concepts of asthma and asthma self-management so they are able to teach children and adults with asthma and their families how to effectively manage their disease using evidence-based asthma self-management practices.

The course will be a combination of 5 virtual meetings consisting of 1.5 hours and 5 hours guided self-paced learning. There is no cost to the participant for the training. The class will be capped at 25 participants to provide a meaningful learning environment.

Dates and Times:

Thursday February 10, 2022 from 4:00 to 5:30 pm

Tuesday February 15, 2022 from 4:00-5:30 pm
