

Be up-to-date on vaccines for respiratory season!

Flu, RSV & COVID are different viruses, which means you may need all these vaccines to protect you & your family.

Annual flu shots are the best way to keep from getting flu each year. And you can receive multiple vaccines at the same visit!

RSV vaccine is now recommended for everyone 75 and older. And for some people 60-74 who are at higher risk.

People over the age of 65 and those who are immunocompromised are at most risk, but anyone can become severely ill and face complications or even death from respiratory viruses.

Call your doctor or pharmacist today to schedule an appointment for the vaccines you need...

...Or scan this QR code to find a location to get vaccinated.
