

# End of Life Care Committee

Jan 8 2026: first meeting

# Agenda

- Welcome – Larry Leeman Chair
- Introduction: 2- or 3-minute limit or less based on number of participants
- Establish quorum and voting
- Review of proposed by laws
- Review of scopes and responsibilities
- Future meetings: Frequency, length and next date

# Scopes and Responsibilities

- *Establish Definition and Scope for End-of-Life Criteria*
- *Therapeutic Team Development*
- *Inclusion of Family and Caregivers*
- *Sites of End-of-Life Care*
- *Education and Workforce Development*
- **Development of Psilocybin Assisted Therapy End-of-Life Care Plans**
- *Ongoing Review and Updates*

# *Establish Definition and Scope for End-of-Life Criteria*

- *Establish definitions and parameters for end-of-life care criteria.*
- *Recognize that end-of-life psychedelic therapy may be viewed through palliative, hospice care, and cultural perspectives.*
- *Support expansive timeframes, including from the time of diagnosis of serious, terminal, or life limiting medical conditions, or from the time of recognition that end of life is approaching due to the natural aging process.*

# *Therapeutic Team Development*

- *Support the development of therapeutic care teams that extend beyond a strictly medical provider and licensed therapist model including palliative and hospital-based nurses, social workers, and related professionals*
- *Explore emerging roles such as psychedelic end-of-life doulas and psychedelic chaplains.*
- *Consider the development of an entry-level facilitator role with appropriate state licensure for inclusion in medical psilocybin program. as part of the care team including medical providers and licensed therapists*

# *Inclusion of Family and Caregivers*

- *Examine circumstances under which life partners, family members, or caregivers may participate in psilocybin-assisted therapy as part of end-of-life care.*

# *Sites of End-of-Life Care*

- *Identify appropriate sites of end-of-life care, including private residences and licensed facilities.*
- *Develop models for home-based end-of-life care.*
- *Coordinate with hospice organizations, home health care agencies, and healthcare and therapy facilities.*

# *Education and Workforce Development*

- *Support education and workforce development related to psilocybin-assisted therapy for end-of-life care.*

# Psilocybin Assisted Therapy EOL Care Plans

- Care plans will include preparation and integration sessions, adjustment of psilocybin dose and number of sessions based on issues specific to EOL care, and involvement of family and caregivers

# *Ongoing Review and Updates*

- *Establish and maintain a process for the periodic review of emerging scientific literature, clinical guidance, and program data as the field evolves*
