

Medical Psilocybin Treatment Fund

(\$630k)

The population potentially eligible for financial assistance is expected to exceed available program funding. The department should therefore prioritize applicants based on household income, clinical eligibility, and treatment appropriateness.

Psilocybin Travel Reserve

Provides reimbursement to qualified patients whose residence or required recovery location is more than fifty (50) driving miles from the treatment center.

Reimbursement shall utilize applicable NMDFA mileage and per diem rates and may include reasonable lodging expenses when overnight recovery is required.

Direct Treatment

Provide vouchers to qualified patients meeting standardized eligibility scale. The department shall establish a maximum voucher amount per treatment episode based on reasonable and customary cost of an approved medical psilocybin treatment plan.

Household Income	Treatment assistance
≤200% FPL	100%
201-225% FPL	75%
226-250% FPL	50%
251-275% FPL	25%
276-300% FPL	10%
>300% FPL	0%

Patient Preparation & Integration

Provides financial assistance for required preparation and integration services associated with an approved medical psilocybin treatment plan. Assistance shall be subject to the same income eligibility scale as direct treatment vouchers. Whenever practicable the patients' health insurance should be consulted to cover treatments not directly involving the administration of psilocybin.
